

GRADE - FOREMAN BOOT CAMP

This course combines both classroom and hands on training that will give the student a comprehensive overview of the essential concepts needed to properly utilize today's modern survey equipment and computers for construction layout. Questions and discussion of techniques will be encouraged to help the beginner gain knowledge and to complete the understanding of the more experienced student. The labs will include practical hands-on use of the equipment and practice of classroom concepts as well as CAD training.

Included in this course:

- Data Collectors
- Field Book Note Keeping
- Uploading/Downloading Point Files
- Coordinate Geometry
- Transferring Benchmarks
- Level Loops
- Centerline Layout
- Offsets
- Mechanical Total Stations
- Robotic Total Stations
- Global Positioning Systems (GPS)
- GPS Localization
- CAD Training
- File Management
