

Empowering Healthcare Services

**We're here for you and your patients.
Let's discuss a customized solution for your facility.**

On-Site Behavioral Healthcare

Behavioral Healthcare in Your Facility

We deliver a full range of psychological, mental health counseling and behavioral health services in facilities ranging from skilled nursing homes and rehabilitation centers to adult homes and assisted living.

On-Site Psychiatry

Comprehensive Psychiatric Care

We provide complete psychiatric and pharmacological care. From assessment to medication management and titration, we bring it all to your facility to ensure that patients are receiving continuous care

Customized Treatment Plans

We have created a unique program of psychological services tailored to meet the specific needs of residents in long-term care facilities. No one size fits all – our clinical team can help to treat and address a wide variety of individual issues.

Patient Care – Your Top Priority.

We understand that, while most long-term care facilities are operating on a shrinking budget in an increasingly regulated environment, patient care remains your top priority. As an Administrator you are balancing compliance issues and budgetary demands with employee recruitment, training, management and retention issues.

With the baby boomer generation entering retirement age, effectively doubling America's senior population by 2030, demands on residential care facilities are only expected to increase.
