

Dream With Me

Dream with me darling
Lay with me
So close we can almost become one

Our naked bodies align
We just finished making love
The only way I can really come
Is when you tell me you love me
Before we both are done

We've exerted our bodies but not our hearts
You never cease to amaze me
I fall in love with you every single day

You pursue me as if it was the first time
When we locked eyes

And we knew then - what we know now

We were meant for each other
We were the final pieces to each others puzzles

We are home
So let us dream together
Before the morning light breaks
We can make love one more time before the children awake
And jump on our bed in their way to say
good morning

Even in this happy earthquake
It's hard to let you go
You're still holding on too

As the children rip us apart
Our time together is done
Our day begins, it belongs to them and the world now

I'll miss you even though we talk throughout the day
And like the heartbeat never skips
You come back home to us
Break off a piece of yourself to make up
For time lost

Even though these children are not yours through blood
You treat them no different
You are the best dad they know

As much as I want to drown you in love
I wait
Until you have your time to be whole again
I am patient for my man

After the kids go to bed
It is just you and me again
Clean and fresh
Ready to collide with one another

We've made love so many times
No reason to keep count

You get me higher each time
Past the clouds
I float away from the euphoria haze

Like aftershocks
I am still pulsating between my legs
In the same rhythm my heart beats for you
Fast , slow and deep
It lingers always

As I am coming down
You are there to pick me up
You know I'm not fragile
But you handle me with so much care

Lay me down slowly
And cover me with your manly scent
I open my eyes and i see you
My man
The man I love
The one I am loyal to
No other man matters to me as much as you do

You run your hand along my face
To move some fallen strands of hair
I join your hand with mine

Not to block or guide
But to connect with you once again

You tell me how beautiful I am
Another act of love
I smile as a single teardrop leaves me and runs along

I lay my head on your chest
And nestle myself in my safe place
In your arms that radiate warmth and strength
I inhale your natural smell
Like forest green or mint
It brings me tranquility and peace

Goodnight my love
Dream with me
So we can be together in body and in the mind
Our hearts are already intertwined
We are connected
