

TRUNKING & UPVC DRAINAGE PIPE

DSP Trunking and uPVC Drainage Pipe offer a range of unique characteristics that make them versatile in their field of application.

These pipes are grey in colour and are commonly used as cable ducting, flush pipe and air-conditioning water discharge outlet.

There is an ease in handling due to the pipe's light weight. This makes transportation and unloading easier and thus minimise operation cost.

The smooth bore provides greater hydraulic capacity and minimises deposit build up or roughening of the pipe walls.

The pipes can be readily joined by solvent welding. This provides the versatility in joining and minimise the flow of obstructions.

Standard Length Per Piece

Type	Length (ft)	Length (m)
Trunking	8	2.44
uPVC Drainage Pipe	9.5	2.9

Comply: 315 SS275:1999
