# MAEGAKI | 前書き (Introduction)

Welcome to the community whitepaper for Shiba Classic. \$SHIBC is a token based on the Ethereum Classic network that allows investors to benefit from a) no tax and b) 100% burned liquidity. In addition to this, the contract is completely safe and is a direct fork of Shiba Inu (with the exception of a 90% reduction in supply).

\$SHIBC is 100% community driven, but what does that mean? Our developer, Fenikkusu, wanted this project to be completely decentralised. With no official team to lead us as investors, it is important that we all participate in promoting the token to help it grow.

The community of Shiba Classic is its most important asset and together, they make decisions on how is best to proceed with marketing efforts.

As our developer said: "They all worked together towards the same goal which was to be the most successful and greatest army of all time." If we want to achieve the same greatness of Shiba Inu, we must work hard together.

If we all work as one, in a single direction, we will be indestructible and great things will come. Our journey starts now.

**"Think lightly of yourself and deeply of the world."  
- Miyamoto Musashi**

# Naze ETC? | なぜ ETC (Why ETC?)

Formula - ETC = BTC + ETH

Not only is ETH a fork of ETC, but the merge to ETH V2 proof of stake system (that will happen in September of 2022) will redistribute the cards.

As ETH miners won't be able to mine on their network anymore, it is expected that many of these will migrate to the ETC network and we can already observe the early stages of their transition.

ETC offers the comfort and security of a proof of work system and this will stay the same forever, just like with BTC. Another benefit to ETC is that its supply is limited unlike ETH where supply can be minted (increased). ETC is also offering a proven and secured network chain that anybody can build on just like ETH. Developers can create tokens, NFTs, metaverse applications and so much more.

What we are saying here, is that this network was an obvious choice for our developer to choose to host our project which is already the most invested in meme coin on ETC - we set the trend!

**"Knowledge becomes really such only when it is assimilated in the mind of the learner and shows in his character."**

**- Bushido**

# TOKUNOMIKUSU | トークノミクス (Tokenomics)

Name: **Shiba Classic**

Ticker Symbol: **\$SHIBC**

Contract Address: **0x1fdc495289b590e78d455cf7faa6cd804de5cbc1**

Total Supply: **100,000,000,000,000 \$SHIBC**

Decimals: **18**

Token Type: **ERC-20**

Tax: 0%

**Liquidity was entirely burned from day 1 to a dead wallet address. No one will ever be able to access the LP tokens, thus making your investment 100% safe.**

# MIRAI | 未来 (The Future of Shiba Classic)

It has been just days since we started this journey together, and what a start it has been! The community has come together quickly and we can all be proud of the efforts that have helped make Shiba Classic what it is. Despite our brilliant efforts, now is the time to double down and take this to the next level. Embrace what is to come, the bad and the good and keep building every day in order to achieve **our** goals.

So far we have:

- **Over 1000 holders of \$SHIBC**
- **An ever-growing number of members/followers on all of our socials,**
- **Been whitelisted and approved by HebeSwap (the biggest DEX on ETC),**
- **Reached the attention of some of the biggest ETC holders and community members,**
- **Gained attention from some major influencers and developers (including Crypto Messiah),**
- **Been listed and tracked by Dexscreener (the first ETC token to do so),**
- **Audited our contract,**
- **Applied to some of the biggest tracking websites in the world.**

Many more exciting things are coming. This is just the start.

**"The sword has to be more than a simple weapon; it has to be an answer to life's questions."**

**- Miyamoto Musashi**

# KETSURON | 結論 (Conclusion)

Keep building and keep working together as an army...

A bright future is awaiting for all of us, we simply need to trust the process, work for ourselves and each other and keep building, everyday, no matter what, one step at a time.

We want to thank you to every member of the community for their great work and dedication, and welcome all the many new members that are about to join us. Remember, those of us that have created this whitepaper are just like yourselves, community members.

Here is to a bright future.

**“I have given you the keys to success and will be acting as your guide in the path you choose to follow.”**  
- Fenikkusu

**Shiba Classic Whitepaper (V1)**

This is a living document and information is up to date at the time of publishing. Please note information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such.

The Shiba Classic community suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Shiba Classic product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products "as is" and is not required to provide any support or services. You should have no expectation of any form from the Shiba Classic ecosystem and its team.

Although Shiba Classic is a community driven DeFi ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on crypto do not purchase it as the team cannot ensure compliance with your territories regulations. Always make sure that you are in compliance with your local laws and regulations before you make any purchase.

**Crypto assets are highly volatile, invest at your own risk.**
