

Wildfire Action Plan

Mineral King, Silver City, Cabin Cove, and Visitors

Wildfires can spread quickly, and being prepared is essential for your safety. This guide outlines the four levels of wildfire alerts and procedures recommended for the Mineral King area. In the event of a wildfire, follow the guidelines and meeting points provided on the back of this flyer.

Communication hubs have been established to share updates and coordinate evacuations. Stay informed, act quickly, and prioritize safety.

Level 1 – EVACUATION WARNING – Potential threat to life and/or property. Those who require additional time to evacuate should leave now. Public access may be restricted, cabin owners still allowed access.

Level 2 – EVACUATION ORDER – Immediate threat to life. This is a lawful order to leave now. The area is lawfully closed to public access. Fire authorities may issue scheduled times to leave. Equipment will be coming up the Mineral King Road. Restrictions on the bottom of the road preventing the public from coming up, everyone out.

Level 3 – SHELTER IN PLACE – Access to or from the Mineral King area or anywhere else may be severely limited or non-existent due to heavy equipment, presence of fire, road closures, obstructions on the road, etc. **Head to or stay in contact with one of the three hubs of communication closest to your location.**

Cabin Occupants - if you are leaving your cabin - Turn off gas and evacuate to the nearest communication hub. See cabin owner checklist.

Campers/Day Use – Gather your gear and head to the nearest communication hub. Only travel up the road with the flow of traffic.

Three hubs for communication/meeting points (see locations on backside):

Silver City Store

West Mineral King Ranger Station

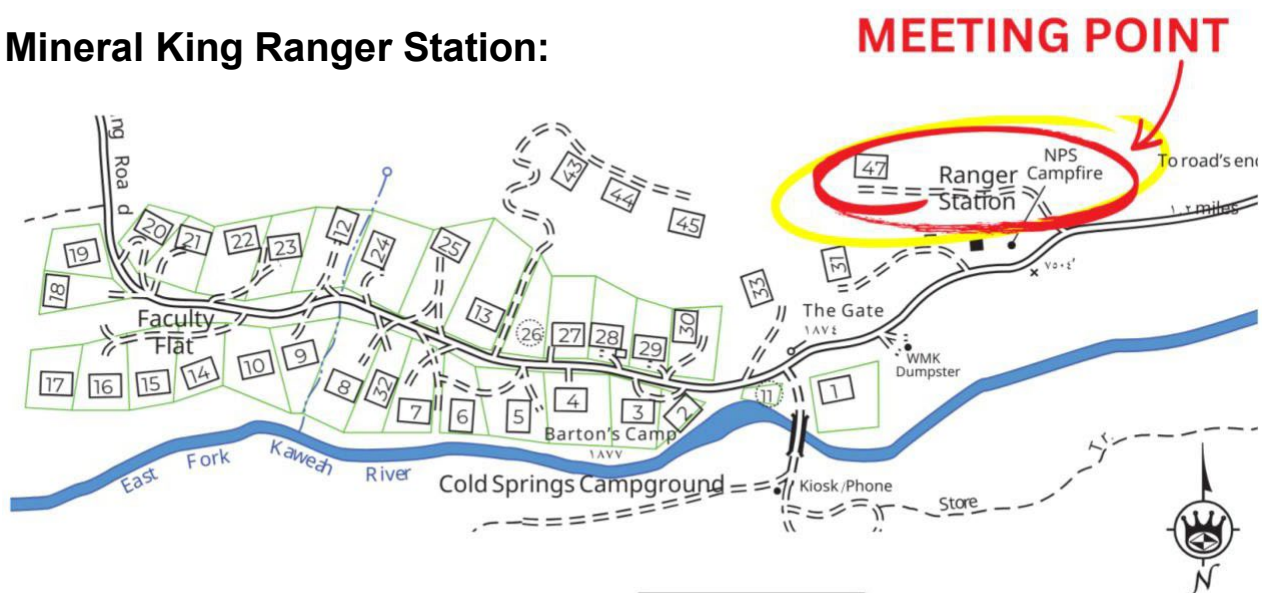

East Mineral King Cabin

Meeting Points – Communication Hubs
