PRAIRIE WATERSHEDS CLIMATE PROGRAM

(On-Farm Climate Action Fund)
BMP: MANITOBA ROTATIONAL GRAZING FACT SHEET April 1, 2025

AGRICULTURE AND AGRI-FOOD CANADA'S AGRICULTURAL CLIMATE SOLUTIONS ON-FARM CLIMATE ACTION FUND (OFCAF): PRAIRIE WATERSHEDS CLIMATE PROGRAM (PWCP)

Support for this project has been provided by Agriculture and Agri-Food Canada (AAFC) through the Agricultural Climate Solutions – On-Farm Climate Action Fund (OFCAF). OFCAF is an initiative designed to assist agricultural farmers address climate change. Read the media release here.

The Prairie Watersheds Climate Program: Manitoba *

Agricultural Climate Solutions – On-Farm Climate Action Fund (OFCAF) was originally a \$704 million, 4-year fund (from 2021 to 2025) which funded programs across Canada to support farmers in adopting beneficial management practices (BMPs) that store carbon and reduce greenhouse gases (GHG) as well as provide other environmental benefits such as improved biodiversity and soil health. OFCAF was extended three more years (2025-2028) and will provide an additional \$300 million to 13 recipient organizations to continue supporting farmers in adopting BMPs.

The Manitoba Association of Watersheds (MAW) is one of the 13 organizations that is receiving funding from the OFCAF expansion. The Prairie Watersheds Climate Program (PWCP) is led by MAW and delivered by Manitoba's Watershed Districts. MAW received \$40,012,707 from OFCAF to continue delivering PWCP from April 1, 2025 to June 30, 2028.

PWCP provides financial support, through OFCAF, to farmers in Manitoba to accelerate their adoption and implementation of on-farm BMPs to reduce GHG emissions, support production efficiency, sustainability and resiliency on their farm operations. To assist farmers with their adoption of new BMPs, the program offers farmers resources to support BMP implementation and provide BMP design recommendations.

The Prairie Watersheds Climate Program (PWCP) works with farmers to increase the implementation of select Beneficial Management Practices (BMPs) on farms in Manitoba. The BMPs eligible under the PWCP focus on three categories:

- 1. Rotational Grazing
- 2. Nitrogen Management
- 3. Cover Cropping

The Prairie Watersheds Climate Program Approach

	PWCP takes a grassroots, regional approach to addressing issues related to climate change in agriculture and supporting farmers to implement BMPs that have a positive impact on Canadian agriculture.
	85% of funding goes towards adoption of BMPs and BMP education/awareness activities for
	farmers, who are the Ultimate Recipients of the program.
	Ultimate recipients (farmers) can seek registration and offset credits under voluntary offset
Ш	credit programs for Greenhouse Gas (GHG) emissions reductions generated with the support of the Prairie Watersheds Climate Program. The ability of ultimate recipients to participate in these markets will be subject to eligibility requirements set up by voluntary offset programs. Ultimate recipients (farmers) cannot apply to any regulatory carbon offset program for the GHG emissions reductions generated between the Project Eligibility Date ("February 7, 2022") and the Project Completion Date ("June 30, 2028") including those dates.
	 GHG Emission Reduction Credits restrictions for Ultimate Recipients only apply to the
1111	fiscal year(s) in which the Ultimate Recipient receives funding.
	All payments made to Ultimate Recipients for BMP adoption in the areas of nitrogen
	management, cover cropping, and rotational grazing are to be considered "farm support payments" as per subsection 234(2) of the <i>Income Tax Act</i> R.S.C 1985. As such all payments to
	farmers are to be considered income for the farm business and are subject to Income Tax.
	MAW will annually prepare and submit AGR-1 Statement of Farm-Support Payment forms to
	the Canada Revenue Agency (CRA) for each Ultimate Recipient that received a PWCP
	payment.
<u>Importa</u>	nt Program Points to Note
	An activity implemented on specific acres of land can be funded by only one recipient of OFCAF funding (i.e. PWCP). For clarity, any project funded through PWCP cannot be funded by any other
	OFCAF program.
	An Ultimate Recipient who participated in any of the eligible BMP activities in a previous
	funding year (2022-2023; 2023-2024; or 2024-2025) can apply for the same eligible
ПП	activities on the same land for the 2025-2026 program year.
	Landlords and tenants both cannot apply for funding on the same piece of land.

PWCP BMP: ROTATIONAL GRAZING: INCREASING THE ADOPTION OF ROTATIONAL GRAZING

Farmers are eligible for a lifetime maximum of \$100,000 of OFCAF funding, through all available

Why Implement Rotational Grazing?

OFCAF programs including PWCP.

Rotational grazing is the practice of containing and moving livestock through pastures to allow forage plants time to recover, deepen their root systems, and improve soil health between periods of grazing. Pastures/rangelands managed under rotational grazing practices have also been found to have higher soil carbon sequestration rates when compared to continuous grazing which can serve as an effective carbon mitigation option. Importantly, ranchers see rotational grazing as an effective way to improve the profitability of their cattle operations while benefiting overall ecosystem health.

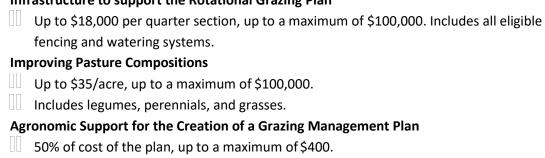

How PWCP Can Help

The Prairie Watersheds Climate Program is helping farmers in Manitoba to deploy real, measurable, and practical climate solutions for agriculture in the Canadian Prairies by assisting them in implementing rotational grazing plans and practices. Rotational grazing allows farmers to manage their forage resources to allow the forage crops to sequester carbon longer during the growing season. Managing the way forages are grazed and allowed to grow throughout the year can store carbon in the soil and release less GHGs into the atmosphere. Sound management of grazing rotations can help to extend the growing season, reducing the need for farmers to harvest and transport feed to confinement feeding locations. Managed rotational grazing can also spread manure over a wider area and provide nutrients to forage crops to reduce the need for synthetic fertilizer use.

Eligible activities under this BMP are: Infrastructure to support the Rotational Grazing Plan

Note: Certain BMPs and activities may have delivery agent-specific funding caps that differ from the maximum amounts listed above.

Program Eligibility Requirements

			ded Practices must:
--	--	--	---------------------

- Be new practices for an operation; or
- Be expanded practices on new land/acres from what has been practiced in previous years.
- Have a rotational grazing plan that supports the practice(s); and
- The rotational grazing plan must be recommended by a licensed agrology professional (with demonstrated competency in the agronomy practice area that may include the CCA designation).
 - To verify a licensed agrology professional (PAg or TechAg) in your area pleaserefer to:
 - Manitoba Institute of Agrologists, (https://agrologistsmanitoba.ca/find-an-agrologist/)
 - To find a qualified Certified Crop Advisor (CCA) in your area please refer to:
 - Prairie Certified Crop Advisor (https://www.certifiedcropadviser.org/certifications/professional -search/)

Note: Third parties accessed in the searches outlined above have not specifically agreed to assist with the OFCAF program and have not been endorsed by MAW or its partners.

Agriculture et

	DIVIF. NOTATIONAL GRAZING FACT SHEL
	All activities must have commenced on or after February 1, 2025, and be completed on or before June 30, 2026.
	All invoices must be dated after February 1, 2025, and before March 31, 2026 (including those dates).
	Invoices and Proof of Purchase must accompany program rebate applications.
	Ultimate Recipients must contribute at least 15% of the total project cost as an in-kind
	contribution to the project.
	Before and after pictures of projects implemented may be required for verification and payment.
	There must be a Rotational Grazing Plan that details the design, purpose, and plans of the
	project. The Plan must also include any of the activities being applied for (fencing, watering
1111	systems, improving pasture compositions).
	Remote watering systems must be powered by a renewable source such as solar, wind, or
ПП	hydro.
	Fencing to support the rotational grazing plan must be incorporated into the grazing plan to be
	eligible. This includes cross fencing, wildlife friendly fencing, temporary fencing, and perimeter
	fencing.
	Perimeter Fencing is not eligible in CAWD Recycled and used watering system components such as refurbished troughs are eligible –
	delivery agent dependent.
	Underground and above ground pipeline systems are eligible including materials, labour, and
	installation costs.
	Razor grazers are eligible.
	Windbreak panels are not eligible in CAWD
	Legumes, perennials, and grasses are eligible under Improving Pasture Composition – subject
	to delivery agent species restrictions.
	Projects on rented land may need landlord approval to proceed.
	Some projects may impact conservation easements and agreements, Species at Risk, or
	other special circumstances may apply. Farmers will be required to ensure all approvals and
	permissions are in place prior to the project occurring.
	<u>e Activities</u>
	Continued implementation of an existing practice on the same acres that occurred prior to
ПП	February 7, 2022. The practice must be expanded onto new acres to be eligible.
	An activity implemented on specific acres of land can be funded by only one recipient of OFCAF
	funding (e.g. PWCP). For clarity, any project funded through PWCP cannot be funded by any other OFCAF program.
	Landlords and tenants both cannot apply for funding on the same piece of land.
	Perimeter fencing is not eligible unless it is part of the Rotational Grazing Plan (watershed district
	specific).
	Removal and replacement of old and/or existing fences.
	Used fencing materials.
	Generators to power remote watering systems; and other non-renewable power sources.
	Costs for dugout construction and water wells are ineligible for reimbursement (can be used
1 11 1	towards the in-kind contribution).
	Texas gates.
	Virtual fencing/GPS collars.
	Portable livestock corral panels.

On-going maintenance.
Grazing co-operatives, grazing associations, and non-profit organizations are not eligible for
funding in this program.
