

INNOVATION IN AGRICULTURE AND ENERGY OPPORTUNITY ZONE SUMMIT ONLINE

This dynamic, immersive 3-day event will alter the face of farming and rural enterprise in America by catalyzing investment in Opportunity Zone communities across the country. Wide-ranging topic sessions and networking opportunities will focus on cutting-edge practices and technologies in food production, food security, food safety and agriculture literacy – from renewable energy and biofuels to the role of satellites, drones and the Internet of Things in precision farming, to Government research grants, job creation and workforce development.

SAVE THE DATE | OCTOBER 19-20, 2020

WHO SHOULD ATTEND?

In partnership with a consortium of Historically Black Colleges & Universities (HBCUs), Land Grant Colleges, Minority Serving Institutions, Small Businesses, and Corporate and Federal Agency partners, participants will include leading voices in agriculture and energy, scientists and researchers, philanthropists and investors, industry leaders and Government officials to engage farmers, faculty, legislators, and community activists.
