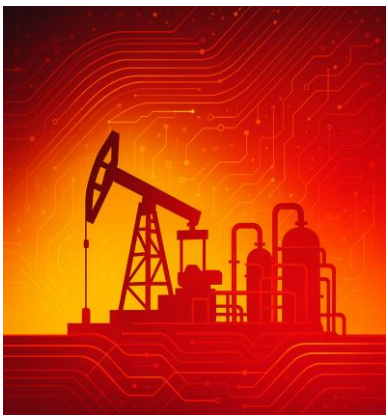
MeruEPC
SECURE. SMART. HUMAN

Elite EPC & Cybersecurity Consultancy

Delivering secure and intelligent industrial projects for critical infrastructure and energy enterprises

50+ Subject-Matter Experts | 98% Client Satisfaction | 15+ Years Combined Experience



Why Partner with MeruEPC?

We help enterprises build and safeguard complex infrastructure by seamlessly integrating Engineering-Procurement-Construction services with advanced cybersecurity, governance and digital technologies. Our AI-enabled framework reduces project risk, ensures compliance and accelerates delivery – allowing you to focus on core operations while we handle the complexity.

Services for Clients

- **Secure EPC Delivery:** Turnkey EPC projects with cyber-resilient design, vendor vetting and secure implementation.
- **Risk & Compliance Advisory:** Comprehensive risk assessments, GRC alignment, policy development and audit support for OT/IT environments.
- **Penetration Testing & Vulnerability Management:** Red-team exercises and ongoing vulnerability assessments for operational technology and corporate IT.
- **Digital Engineering & Twins:** BIM, 3D/4D modelling and digital twins to optimise design and lifecycle performance.
- **Automation & AI Integration:** AI-driven analytics, predictive maintenance, process automation and machine learning solutions.
- **Emerging Technologies:** Secure 5G networking, blockchain supply-chain security and industrial IoT implementation.
- **Training & Support:** Customised workshops and ongoing support to ensure sustained cybersecurity and operational excellence.

Engagement Models

- **Project Delivery:** Full lifecycle management of engineering, procurement and construction with integrated cybersecurity.

• **Advisory & Audit:** Short-term consulting engagements for risk assessments, compliance audits and strategic roadmaps.

• **System Integration & Upgrade:** Design and implementation of OT/IT enhancements, secure migrations and digital transformation initiatives.

• **Ongoing Support:** Managed services for vulnerability management, penetration testing and continuous improvement.

How We Deliver

1. **Discovery & Scoping:** Understand client objectives, constraints and regulatory obligations.

2. **Solution Design:** Develop a secure, compliant blueprint integrating engineering and cyber requirements.

3. **Execution & Quality Assurance:** Implement solutions with rigorous oversight and multi-stage quality checks.

4. **Handover & Support:** Transfer knowledge, provide documentation and offer ongoing support and maintenance.

Client Benefits

• **Reduced Risk:** Proactive identification and mitigation of cyber and operational risks.

• **Regulatory Compliance:** Alignment with international standards (e.g., ISO/IEC 27001, NIST) and industry regulations.

• **Optimised Performance:** AI and digital tools increase efficiency, reduce downtime and extend asset lifespans.

• **End-to-End Accountability:** Single point of responsibility for engineering, procurement, construction and security.

• **Scalability:** Solutions tailored for projects of any size – from targeted upgrades to multi-billion-dollar facilities.
