### **MICRO PLANNING INTERNATIONAL**

#### **The Company, The Software, The Solution**

For more than forty seven years Micro Planning International (MPI) has been providing full-service project management to clients worldwide.

MICROPLANNER has always been the project management software by which others are judged. It is a high performance package that makes planning and management easy for both novice and power users alike.

Micro Planner X-PERT for Windows is even more sophisticated, has a host of new features, much higher capacities and is easier to use. Details of some of the X-PERT's major features are set out below, for additional information contact your local Micro Planner representative or Micro Planning International directly.

Provide high level consulting services in all aspects of Planning, Scheduling, Resource Analysis and Earned Value Performance Measurement for Project Controls and Governance

MPI is a member of Technical Committee [ISO/TC 258](#) ISO 21500, for Project, programme and portfolio management and provides Earned Value expert advice to the committee and to Standards Australia
