SKILLS

CMS Adept, ACS Adroit, Python, JavaScript, HTML, CSS, Spanish as a second language, FAA remote pilot certification

ABOUT

I'm a film & TV professional, and veteran content strategist with an extensive background in publishing and journalism.

Drones have become indispensable tools in the film & television industry, offering unique aerial perspectives that were previously either impossible or extremely expensive to capture.

As an FAA-certified drone pilot with a background in publishing and journalism, I bring a keen eye for storytelling and composition to the film table.

My experience in journalism may also help navigate the legal and ethical considerations surrounding drone usage, ensuring compliance with regulations and respecting privacy concerns.

With my multifaceted expertise, I'm well-positioned to contribute creatively and professionally to film & TV productions using drones.
