

Carnivorous Plant Care Sheet

WATER- Use distilled, reverse osmosis (RO), or rainwater. Do not use tap water or bottled drinking water.

SOIL- Must be planted in sphagnum/ peat based substrate. Do not repot in gardening soil or potting soil.

LIGHT- Bright. Place near south facing window or under plant lights.

Carnivorous plants prefer wet conditions. Keep plant wet and don't let it dry out.

For our premade terrariums- water level should be halfway up height of moss.
