FORCED TO SHOOT, CHARGED WITH MURDER

THIS TRUE STORY IS A CRITICAL REMINDER OF WHY A GUN IS NOT ENOUGH...

A USCCA Member named Brian was helping a family member the day after a horrifying attack. Brian was well-trained and had spent years learning about and practicing using firearms for defense. The day before his life changed forever, a deranged man had attacked his family member. *It's hard to imagine such evil...*

Here's what happened: Brian accompanied his family member to gather some things from her home. Unfortunately, the attacker returned to the scene of the crime. Brian did exactly what the USCCA teaches: He stepped between her and the angry man and attempted to defuse the situation without violence.

TRAINING TIP: You **MUST** think about where to place yourself in a variety of scenarios – and how to defuse them – in order to keep your loved ones safe ... even if that means putting yourself in danger to protect them.

The attacker refused to leave and rushed toward Brian. Brian kicked the man in the chest, sending him backward and down the steps of the house. The attacker ran away, and Brian ran to his truck

While he was locked up in the worst cell block – a place which held the most-violent criminals – Brian remembered his USCCA Membership. He was able to get a message to his parents. They contacted the Delta Defense Critical Response Team, who *immediately* went to work.

The 24/7 Delta Defense Critical Response Team exists to help USCCA Members navigate the foggy aftermath of a self-defense incident. Brian wishes he had called them immediately after calling 911.

An attorney from the USCCA Attorney Network drove straight to the jail to visit Brian. He launched his own investigation, connecting all of the dots the detectives and police officers had missed. He worked diligently to get this innocent USCCA Member out of jail, home to his loved ones and **cleared of all charges.**

Frankly, it took a lot of time, it took a lot of money – **\$68,500** in attorney fees, to be exact – and it took a HUGE toll on Brian's family.

Brian shudders to think what would have happened if he hadn't had a USCCA Membership. In fact, he believes he would still be in jail, awaiting trial ... or in prison, convicted of a crime he didn't commit.

This is the most important part of the story: Brian protected himself AND his family members from a deranged criminal. He kept them safe. **They're alive today because HE KNEW WHAT TO DO.**

What matters most about having a gun for self-defense is HOW you prepare for a potentially violent incident.

That means excellent training. After all, the best way to win a gunfight is to AVOID it in the first place. Being prepared means avoiding danger. It means knowing how to de-escalate a potentially violent situation. And, if you're forced to draw your gun in self-defense, it means knowing **EXACTLY what to do next.** It means making the right decisions, knowing how to find cover, giving a verbal command and avoiding pressing that trigger at all costs. If necessary, **it means not hesitating.** It means shooting accurately under pressure. That's what makes all the difference. And that's what the USCCA is here to help you do.

to get his phone and call the police. Moments later, the attacker returned ... **holding a metal pipe.**

Brian grabbed his legally concealed pistol out of his truck and told the assailant to STOP.

Despite Brian's verbal commands to back off, the attacker rushed toward him, metal pipe above his head and ready to swing. **Brian was forced to shoot in self-defense.**

Brian did everything he could to AVOID having to use his gun in self-defense. This is serious: You NEVER want to be forced to shoot. But if you MUST, then you absolutely must be READY.

Brian immediately called 911. After the ambulance and police arrived, he complied with every request. He remained calm as he was handcuffed, knowing the detectives were just doing their jobs...

At the police station, Brian realized something was wrong. Even though his family member corroborated his story, and even though there was little evidence to support it, **he was charged with first-degree murder.**

TRUE MEMBER STORY

WOMAN FORCED TO SHOOT INTRUDER ... NOW WHAT?

A USCCA Member was alone, working late hours in her office, when **an intruder broke in through her locked door.**

Now, it's important to note: This member had taken a class. She knew the laws in her area. She was legally permitted to have a firearm with her. She had trained with her gun and knew how to use it.

The intruder advanced toward her, so she gave him a verbal command to stop. *Unfortunately, he didn't listen and kept approaching.* **In fear for her life, the woman was forced to press the trigger in self-defense.**

After calling the police, this USCCA Member called the Critical Response Team. The benefits that came with her membership helped fund the counsel she retained to assist her. Her counsel guided her through the investigative phase and in handling media questions until the district attorney's office came to the conclusion:

She was justified in using force in self-defense.

Now this is the most important part: There's no telling what that intruder *might* have done to her ... and nobody should EVER have to live through fear like that.

Frankly, the woman is alive today because she was prepared. As a USCCA Member, she was educated, trained and equipped (with a gun and the legal right to carry it). She did everything right but was trapped and thus forced to press the trigger in self-defense.

The 24/7 Critical Response Team was there for her when she needed help and guidance. And her USCCA Membership benefits funded her counsel. (Talking to ANYONE after a violent self-defense incident, including detectives and the media, is downright difficult — and no one should have to do it alone.)

Best of all, this woman is alive today because she KNEW what to do. **Hopefully you will be able to say the same thing for yourself and your loved ones if, God forbid, the worst comes to pass.** USCCA Membership is hands-down the best place to start.
