

Premier Mount N Trail

The deliverance of Accumulation of Level Points Carrying over from the previous Year. “Point Out”

In 2022 Premier Mountain Trail adopted a few very important rule changes for our competitors to help keep the integrity and momentum of the mountain trail discipline moving forward and growing. By making these changes we are hoping for growth in the sport and to further develop our competitor's partnership skills with their equine. PMT made modifications to what was required in each level's patterns and have added point limits of up to 500 points in the following levels: Green, Youth Level 1 and 2, Adult level 1 and 2, and Open level 1 and 2. (See rulebook for more information on PMT Divisions and Levels)

As we move forward into 2023 (being the first year we are carrying points over in certain levels), we have gathered and tallied ONLY the classes that are accumulating points that have the potential to "point out" of these levels. In doing this, competitors showing in these specific levels will start the 2023 season with accurate knowledge of the total amount of points they have rolling over into the new season. As our new season of competitors accrue points throughout the 2023 year, PMT will be frequently updating ALL members accumulated points and they will also be listed below. Thank you for understanding as we get this newly adopted system up and running. We look forward to having all competitors' total standings and points updated as frequently and often as possible throughout the year.
