AVAILABLE SERVICES

Heating & Cooling Systems

- Central Air Conditioner Replacement
- Forced Air Unit and Room Air Conditioner Replacement
- Evaporative Cooler Installation

Solar Services

- Solar Water Heater
- Rooftop Solar System (owner occupied only)

Climate Resilience

- Attic Insulation
- Door Weather–Stripping
- New Windows

Appliances and Lighting

- LED bulbs
- Washer and Dryer Replacement
- Whole House Fans
- Refrigerator Replacement
- Ceiling Fans
- Water Heater Replacement

Low-Income Weatherization Program (LIWP)

The Farmworker Housing Energy Efficiency and Solar PV program is part of California Climate Investments, a statewide initiative that puts billions of Cap-and-Trade dollars to work reducing greenhouse gas emissions, strengthening the economy, and improving public health and the environment- particularly in disadvantaged and low-income communities. For more information, visit the California Climate Investments website at:

FARMWORKER HOUSING ENERGY EFFICIENCY AND SOLAR PV

ABOUT THE PROGRAM

LIWP's Farmworker Housing Energy Efficiency and Solar PV Program component installs free energy efficiency measures at eligible homes to save energy and reduce greenhouse gas emissions. All services are provided at no cost to eligible low-income farmworker households.

This program:

- Increases energy efficiency of homes owned or rented by farmworker families
- Reduces energy bills
- Can fund solar photovoltaic (PV) panels
- Includes some health and safety improvements and repairs to homes

Serving the Community

This program serves farmworker households in **Imperial**, **Fresno**, **Kern**, **Madera**, **Merced**, **Monterey**, **Riverside**, **San Joaquin**, **Santa Barbara**, **Stanislaus**, **Tulare**, and **Ventura** counties.

At least **one** household member must be an **agricultural employee** and the household must meet the program's **income guidelines** to qualify.

If the household qualifies, one of our trusted contractor partners will evaluate the home for the **best available upgrades**.

COMMUNITY ENGAGEMENT

CSD selected La Cooperativa Campesina de California as the administrator for this program. A team of partner organizations is coordinating outreach, enrollment, and services. The team includes MAROMA Energy Services and Migrant and Seasonal Farmworker Agencies.

The team is working with local governments, community organizations, farms and agricultural employers to refer farmworkers to the program.

This program needs community partners to successfully deliver services to some of California's most vulnerable households.

Program Administrators

- California Department of Community Services and Development (CSD) **www.csd.ca.gov**
- La Cooperativa Campesina de California **www.lacooperativa.org**
- MAROMA Energy Services **www.maromaenergyservices.com**

This is a state-funded program provided through approved partners at no cost to households. For a complete list of trusted program partners and other information, go to: **www.csd.ca.gov/Pages/Assistance-Farmworker Assistance.aspx**

PREVIOUS PROJECTS

Since 2015, LIWP has installed free solar PV and energy efficiency measures in more than 20,000 households.

Many agricultural families have already benefited from these services, including Mario Contreras' family in El Centro, Imperial County.

> ***"The services and experience I received through LIWP have been very good. The contractors who helped me were great and communicated with me throughout the entire process. I received brand new solar panels and other energy efficient appliances for my home, and I have seen a huge difference in the amount I pay every month for my bills,"*** – Mario Contreras

Guadalupe Valenzuela's family in nearby Calexico also qualified for free measures including solar PV, that have helped her save on her bills.

> ***"This month's electric bill is incredibly low at $10"*** – Guadalupe Valenzuela
