## * Innovative naked-eye 3D Technology & Solutions *

We provide naked-eye 3D technologies and solutions powered by Artificial Intelligence to support Telcos, AVOD (Advertisement Video-on-demand), SVOD (Subscription VOD), TVOD (Transaction VOD), New Media and Live Platforms to launch the naked-eye 3D content services.
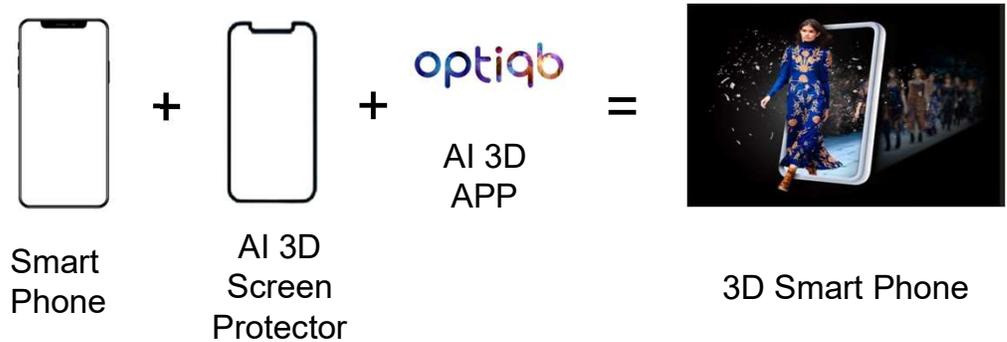

We carry out the 3D engine for 2D-to-3D conversion development, leverage the technologies of eye-tracking and the spatial location recognition, develop artificial intelligence technologies together with our 3D screen protectors to support viewers to watch 3D content at any time anywhere without wearing those expensive and uncomfortable AR/VR glasses or helmets.

* Start to embrace 3D Live and VOD contents with Optiqb *

from 2D to 3D

* Optiqb turns your smart phone into naked-eye 3D phone *

Smart Phone + AI 3D Screen Protector + AI 3D APP = 3D Smart Phone
