Visualizing Standard vs. Extended Cuts on a Timeline

STANDARD CUT VIDEO TIMELINE:

EXTENDED CUT VIDEO TIMELINE:

Cinematic Pre and Post-Ceremony Video Montages include extensive coverage of getting ready, first looks, formal photos, cocktail hour, drone footage of the grounds, decor, wedding details, etc. , all set to the music you choose... any music, popular or otherwise. Cinematic Highlight Videos (Short Films/Music Videos) will also include key moments from Pre and Post-Ceremony Activities.

*1- Reception coverage duration is contingent on the hours of coverage that are booked. Some packages cover the first hour or two of the reception, others will cover the entire reception.

*2- Drone flight is FAA, venue and weather permitting. 90% of the time flight is no problem!

***3- With an Extended Cut, Pre & Post Ceremony coverage will be more extensive in order to create elaborate cinematic video montages for your video, turning it into a more movie-like Full Length Film.**

*4- A Second Videographer is included with some packages, and an add-on for for others. We recommend a 2nd shooter if you'll need us in two different places at one time, or want more extensive coverage of the day in general.

*5- A Video Message Station is a camera we'd set up at your reception inviting guests over to leave well wishes at their leisure. It's generally possible with a second videographer and completely optional (you can choose not to have this at your wedding), and we can sometimes do this with one videographer as well instead of filming open dancing :)
