

**OUR PROCESS**

# Process Timeline

*A simple path from idea to orchard.*

## Discovery Call

We start with a short conversation to understand your goals, location, timeline, and whether the project is a good fit.

## Consultation

We visit the property, study the site, and help you understand what is possible. This is where clarity begins.

## Design & Estimate

For installation projects, we develop the design direction, plant palette, scope, and estimate so you know exactly what is being created.

## Install & Care

Once approved, we schedule the installation, prepare the site, plant the orchard, and guide you on the next steps for establishment and long-term care.

**Ready to begin?** Book a Discovery Call to start the conversation. <https://backyard-orchard.com/>
