VOTER VERIFICATION IS SECURE AND GUARANTEED WITH ELECTRONIC VOTING!

Hello

Voting Verification is Secure and Guaranteed with Electronic Voting

- **Only Voters properly registered will be provided an electronic voting ballot.**
- A voter needs to submit the same ID to vote electronically as the voter would to vote “in person” and will be provided a unique password in order to vote electronically.
- **Voting twice is impossible.** A demo of the Simply Voting process can be viewed [here](#) and a demo of the eBallot process can be viewed [here](#).
- Electronic voting will precede “in person” voting.
- After electronic voting closes, the list of who voted electronically will be **verified** and sent to the Caucus. It will be checked before a voter is allowed to vote “in person.”
- After in-person voting closes, the **verified** electronic voting results will be emailed to the Caucus and added to the “in-person” ballot results to determine the voting outcome.
- **Audit raw data which confirms** the results for each voting outcome **will be preserved and available for review.**
- The **technology** used by the electronic vendors is the **same technology used nationally by banks and financial institutions** across this country for online financial transactions.

CONCLUSION!

A **“Yes” vote means** more residents can participate and everyone’s voice can be heard!

A **“No” vote means** continued low turnout and small agenda and bias driven groups will have outsized influence. Voters who can’t appear “in person” are disenfranchised.

Stand with us and all the other community leaders who endorse this Amendment [here](#) and vote “Yes” for the Amendment!

YOUR VOTE! YOUR WAY!
