

Thomas B. Mansfield & TM Service Becomes a Representative For Autoflame in the Rockies (CO&WY)

Servicing Colorado & Wyoming - Thomas B. Mansfield & TM Service proudly announces its recent partnership as the representative for Autoflame in the Rockies region. This collaboration marks a significant milestone in bringing cutting-edge combustion control and monitoring solutions to commercial and industrial clients across the territory.

Autoflame Engineering, a renowned global manufacturer, specializes in top-tier combustion control and monitoring solutions designed to optimize efficiency, reduce emissions, and enhance reliability in boiler plant operations. As a trusted family-owned British company with over 50 years of expertise, Autoflame has earned numerous awards and certifications, including ISO 9001:2015 and ISO 14001:2015 accreditation, as well as the prestigious Queen's Award for Enterprise in Innovation.

"We are thrilled to represent Autoflame in the Rockies, Our service team is ready to get to work on Autoflame's state-of-the-art technology," said Jimmy Malseed Operations Manager at Thomas B. Mansfield & TM Service. "Autoflame's commitment to innovation and sustainability aligns perfectly with our mission to deliver high-quality solutions to our customers. With Autoflame's industry-leading products, we are poised to revolutionize combustion control and monitoring in our region."

Autoflame's comprehensive range of products, including the Mini Mk9 burner controller, offers advanced features such as precise combustion trimming using UV spectrum monitoring, enabling instantaneous adjustments for enhanced efficiency and safety. Moreover, Autoflame's solutions help clients meet environmental regulations, achieve energy savings of up to 10-15%, and facilitate the transition towards net-zero.

Thomas B. Mansfield & TM Service is committed to providing exceptional service and support to clients by leveraging Autoflame's solutions. With a team of highly skilled professionals and a focus on customer-centric solutions, the company aims to drive innovation and efficiency in the region's industrial landscape.
