A WORLD OF DESIGNER FINISHES

Kiro Finishes aims to bring some of the most modern and unique surface and wall finishes to India. With around 10+ years of experience in commercial and residential properties, we know we can help you materialize your vision...

**Partnering with
companies from around
the world to give you the
best.**

NATURE FIRST

While curating products at Kiro Finishes, we have partnered with companies with a similar view towards building environmentally friendly and green spaces. Most of our products are natural in composition.

Lime finishes constitute around 96% naturally-occurring raw materials. Cork finishes are made of cork, clay, and beeswax. Clay finishes are developed using only natural clay.

In order to reduce waste, we aim to incorporate recycled materials including glass chips and mirror chips in our terrazzo products as well.

By building with quality as our priority, we strive to create long-lasting finishes to prevent wastage in the long run by reducing the number of reworks required.

Tried and tested products developed with nature in mind.

Products like lime have even shown their longevity, evidenced by the long-lasting preserved architecture of European buildings.

NATURAL LIME

Our Natural Lime Finishes constitute around 96% of natural raw materials, which promote well-being and a cool indoor climate.

Application is possible across all surfaces due to its versatility, and it is capable of delivering a seamless look due to this.

Sustainability is the goal of procurement of our Natural Lime products, making it a marquee product among those concerned with our planet's future.

GIVING LIFE TO YOUR SPACE

01

Living breathing surfaces, made of our limestone marble plasters actively support well-being by providing a well-adjusted balance of the indoor climate. They regulate humidity and thus improve the air quality in your rooms.

02

Versatile and diverse, yielding itself to use on all surfaces **from walls to flooring**, kitchens to home theaters and even bathrooms. The color range is adaptable as well with 46 standard colours and also the ability to tint to your requirement

03

Human touch and artistry, with the nature of application and the gradients of the product on offer, we are able to provide a range of finishes that could leave you with a stucco-marble like finish or a cloudy and rough finish.

Our product is sourced from Germany, through Frescolori. A company with 30 years of experience in the field and a goal to provide products that are natural, sustainable and at the same time, capable of making any design a possibility. The company has been awarded the German Design Award 2023, and the Reddot Award 2014 among other accomplishments.

Colorificio MP is a Italy-based company that has been operating in the paint and building renovation market since 1969. The company has been offering innovative solutions and has developed newer products over time. MP also manufactures green products that are developed in their 100% green factory.

MARMO DI VENEZIA

Italian tradition of pure lime plaster with a high-gloss finish for the decoration of refined and elegant interiors. Leaves surfaces with a stucco like smooth finish.

RASATO TRAVERTINO

This ancient tradition has been given a modern twist and can be used both indoors and outdoors. With Rasato Travertino, you can achieve textured finishes and the classic Travertine stone effect.

RASATO FINE

Lime-Based Polished Plaster for a Sleek, Semi-Gloss Finish and Modern Decor. Not only does it create a stunning concrete effect, but it's also perfect for modern decorative surfaces.

NATURAL CLAY

Clay is one of the oldest building materials in the world, and using it gives the surrounding environment a natural feel.

Clay with its natural properties creates a safer and more balanced internal temperature and thereby helps conserve energy.

With no chemical additives, the clay we use promotes ecological sustainability as this is one of our main goals at Kiro Finishes

MODERN, BUT CLASSIC

01

Contemporary and sustainable, with products that are made only with naturally occurring materials and no chemical additives. One of the oldest building materials, creating surfaces that last.

02

Optimal insulation and healthy interiors, that keeps the internal climate cool in summer and warm in winter. The surfaces act as a humidity buffer and binds odours and pollutants in the air, reducing level of bacteria

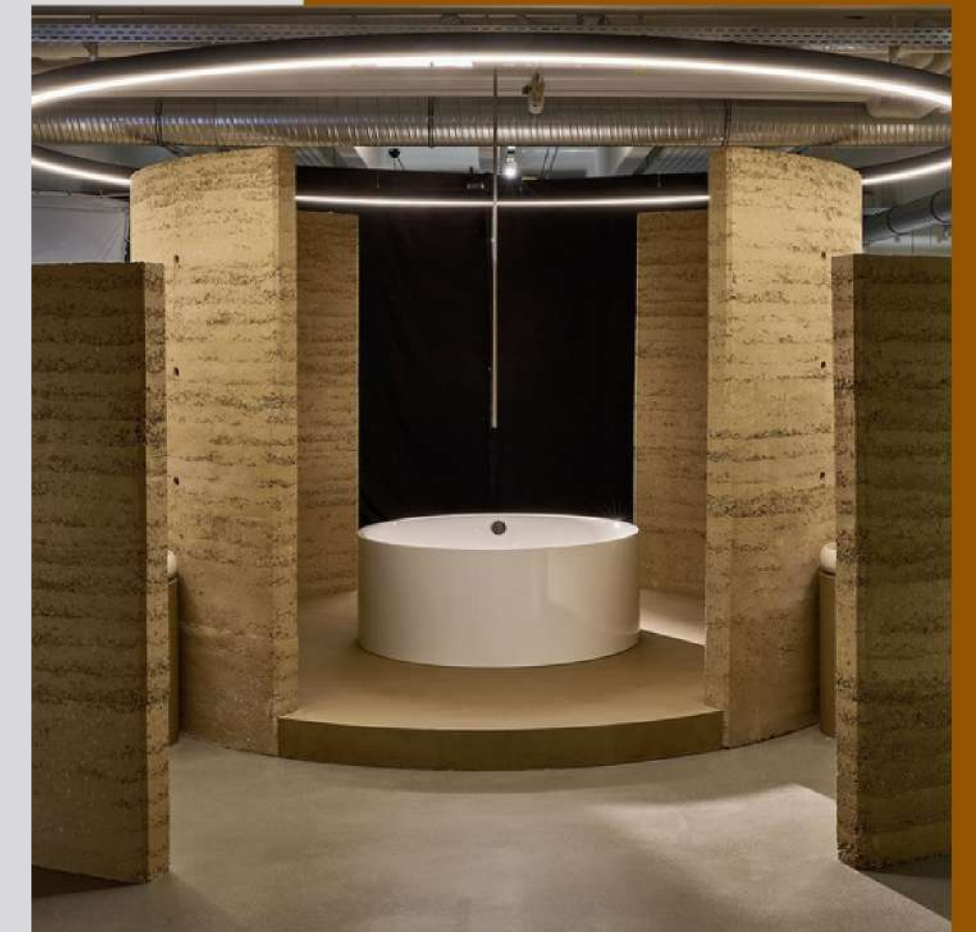

03

Modern and Rustic finishes are possible with our offerings which can create modern looking walls with seamless handcrafted look, stucco like marble effect walls and rough gradient rustic walls.

Our product is sourced from Germany, through our partners Conluto, a company with 30 years of experience in the field of ready-mixed clay products. The company believes that the future is in sustainability and hence focuses on creating nature-friendly products with modern applications.

conluto
Vielfalt aus Lehm

PLASTER

Mixture of Clay, Sand and Chopped Straw

- Clay Undercoat Plaster
- Clay Overcoat Plaster
- Clay Fine Finish Plaster

Can be left exposed for rustic look

WALL & SURFACE FILLER

Clay based sandable Pre-mixed filler compound.

Can be used for levelling and smoothing coat before painting

DECO CLAY FACING PLASTER

Mixture of Clay and Fine Quartz Sand

Thin Layer Pre-Coloured Facing Plaster

- Cloudy and Shimmery
- Available in 16 Shades

CLAY PAINT

Available in two finishes

- Even, Matte and Cloudy
- Textured with granules

Comes in a range of 36 earthy looking colours

DECO SMOOTHING PLASTER

Also called as Clay Stucco giving a smooth marble like finish

Available in 12 Shades

NATURAL CORK

Cork is developed naturally using cork, clay, lime and wax to create a highly versatile surface cladding.

Cork application while being aesthetically pleasing has several additional functionalities including thermal and sound insulation, as well as lifelong elastic properties

Our cork surface cladding is made by recycling waste cork material from cutting of wine bottle corks promoting the reduction of wastage.

BUILDING GREEN

01

Designer yet functional, Cork finishes while being versatile in look, also provide thermal and sound insulation which over time can provide energy savings as well. Cork is elastic and prevents cracking

02

Natural in composition, Cork is made using only natural materials like Cork, Clay, Lime and Wax. The product is hydrophobic as well which prevents walls from absorbing moisture and thereby preventing mould from festering.

03

Formulated with sustainability in sight, as the cork products are made using waste materials from manufacture of wine corks.

Diasen is based in Italy and brings around 20+ years of experience in this field. Their expertise in developing functional yet aesthetic products, all while placing a key focus on reducing wastage and promoting natural products, is what excites us to introduce cork finishes to our clients.

DECORK DESIGN

Decorative coating for interior walls, floors and ceilings made of cork and water based resins, with high thermal insulating properties, breathable and water repellent.

DECORK FACADE

Functional coating for exteriors, with high elasticity and ability to cover existing cracks. Excellent adhesion on wood, metal, plasters, synthetic materials, and cementitious substrates.

DECORK ALFAREFLEX

White reflective finish for exterior based on cork and water-based resins for external walls capable of reflecting incident solar radiation. Facilitates savings on energy expenditure.

DECORK MEDITERRANEO

A modern-style decorative cork-based finish from Roman and Greek ancient tradition. It can be used on walls and floors and allows for a rich repertoire of effects.

DIATHONITE THERMACTIVE 0.37

Cork-based spray-applied thermal insulation plaster solves the problem of heat and cold using natural elements. High compressive strength, fire resistance, and porosity.

DIATHONITE DEUMIX+

Dehumidifying and anti-saltpetre plaster, with good thermal insulation properties made of cork and natural hydraulic lime, aimed at improving interior air quality.

MICROCEMENT

Microcement is a decorative coating which allows for a smooth & seamless flooring and wall finish, giving every room a feeling of continuity and spaciousness.

Microcement application is possible on horizontal and vertical surfaces as well as in wet areas, making it versatile and usable for indoors, outdoors, kitchen fronts, showers, and swimming pools.

An added advantage of Microcement is that its application is possible over existing flooring or wall finishes like tiles, marble, plasterboard.

VERSATILE AND BEAUTIFUL

01

Durable and Highly Resistant, usable on flooring and walls. Can tolerate high traffic environments when used on floors and available in different gradients to promote non-slipability. Abrasion, Fire and Stain resistant.

02

Self-Leveling, Adaptable Finishes creating natural looking floors and walls. Applicability is diverse that encourage use everywhere from swimming pools to balconies. 40 Standard Colours and more on demand to meet any requirement.

03

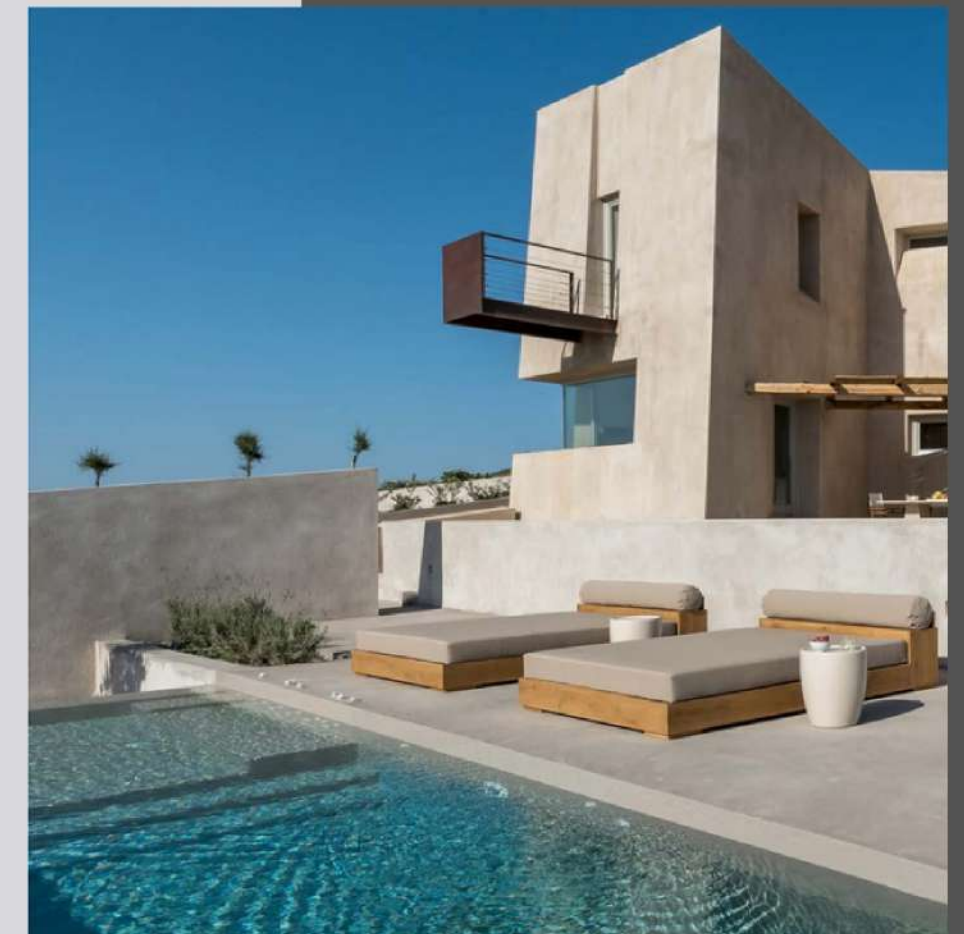

Hand Crafted, Artistic product line allowing for a human touch giving every surface a natural and unique feeling that's appealing to the eye.

Our product is sourced from Spain, through Cemher®. A company with more than 80 years of experience which offers the highest quality products in the market with unparalleled versatility in application. We also source microcement from MP Colorifico based in Italy, a company founded in 1969, that brings years of experience into their product Creativo®.

CREATIVO®
LIVING A NEW LIFE

A QUALITY PRODUCT

You cannot go wrong with our Microcement as we ensure that we leave you with the finish of your dreams and never compromise on quality.

The products we use speak for themselves.

Elasticity and flexibility

Fits any shape or geometry

Durable and robust

Adherence on all types of substrate

Continuous Joint-free

TERRAZZO

Terrazzo Flooring Dates back to around 500 years ago with modern materials only enhancing its beauty and durability

Terrazzo flooring has been designed to serve heavy foot traffic areas like large scale commercial venues

To increase sustainability we utilise recycled aggregates to create our low maintenance floors

TIMELESS FLOORS

01

Dependable and Long lasting, with the ability to last the lifetime of the building. Terrazzo is highly suitable in high traffic areas as is highly capable of dealing with heavy foot traffic

02

Creative Freedom and Flexibility, gives the opportunity to make any vision a reality. By altering the aggregates and the pigments, Terrazzo floors can look completely different while holding onto to its durability

03

Long-Term Cost Saving, with the lowest lifecycle cost of any floor finish available including tiles, carpet and vinyl products. Durability leads to less frequent repairs

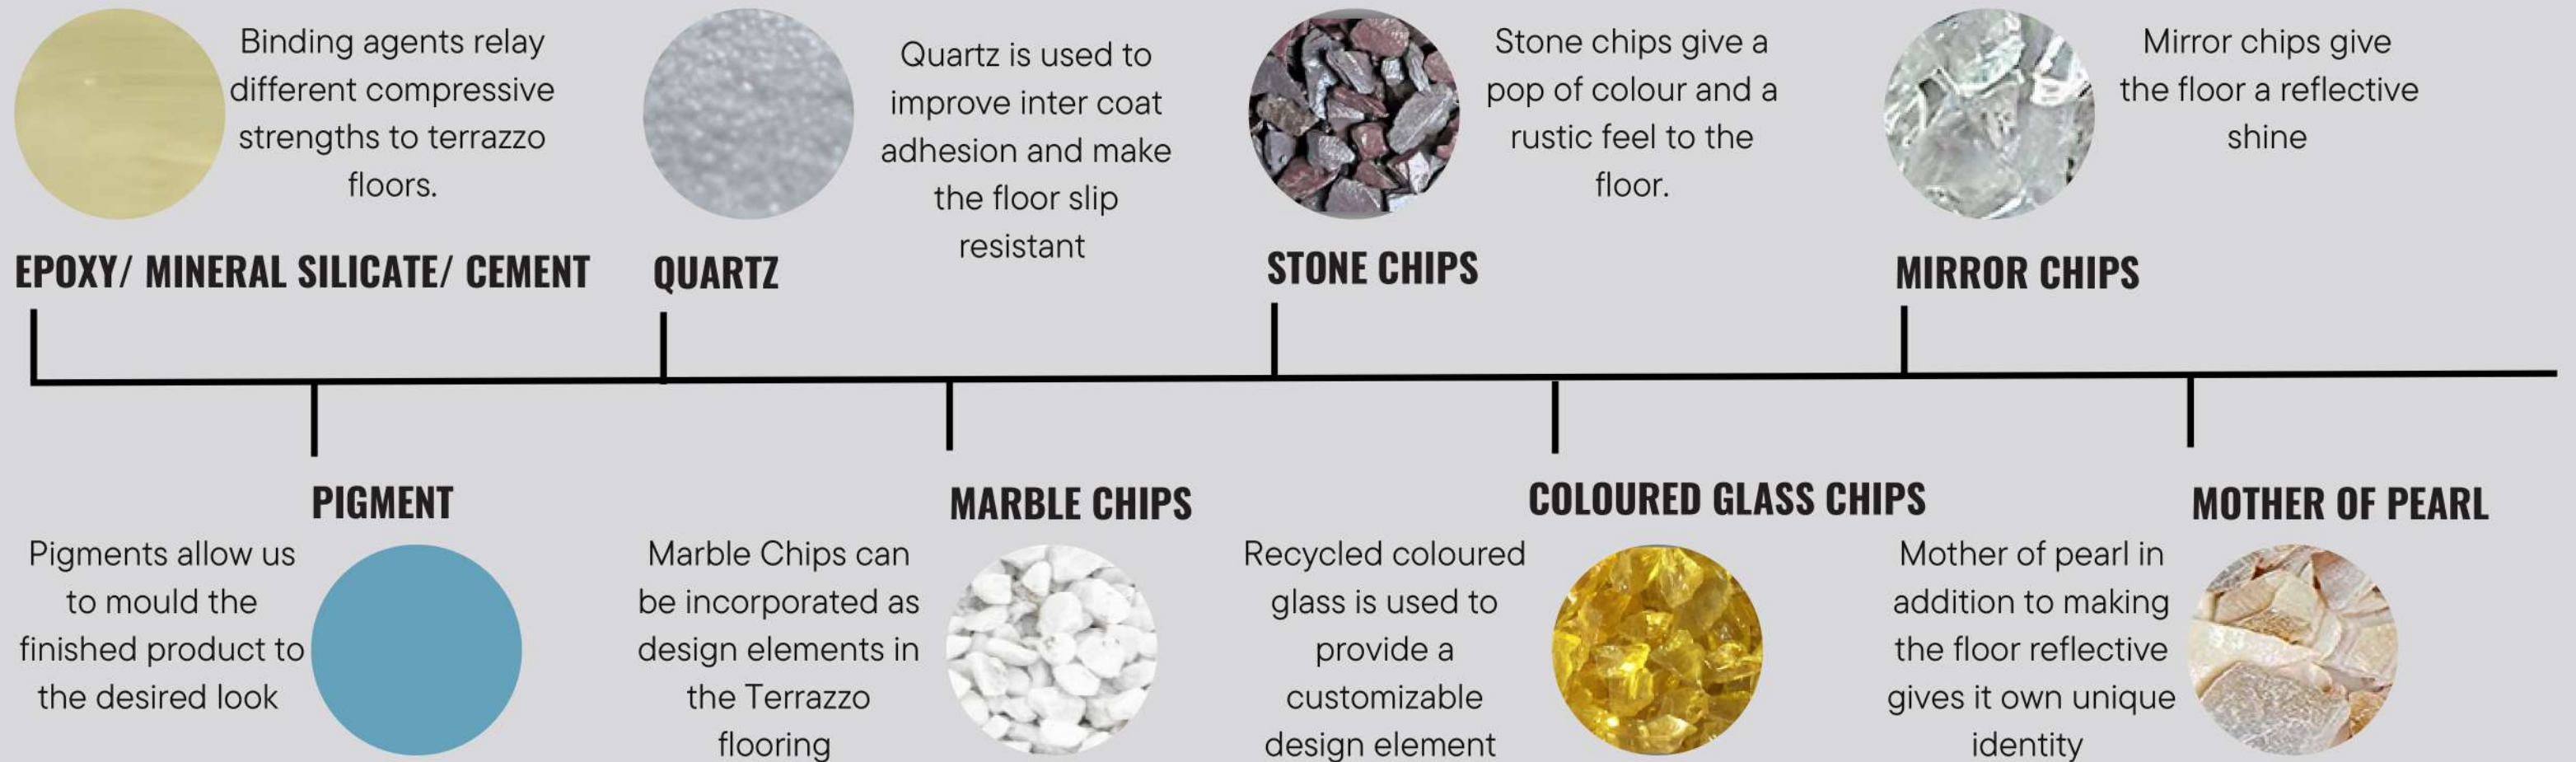

We source our Terrazzo from suppliers across India as well as composite products from our partners in Portugal, Siband. Siband is a family run business with around 50 years of experience in the making of manufacturing aggregates and mortars.

sib

MAKING OF TERRAZZO FLOORING

Our Terrazzo flooring constitutes of several components with a collective goal of creating a beautiful yet durable solution to meet any creative requirement

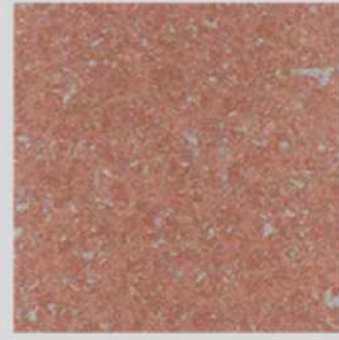

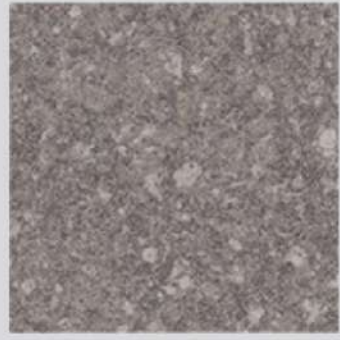

STONE FINISHES

Our Stone Finishes are available in the form of prefabricated sheets that can be used on interior and exterior walls

The sheets are super durable and weather proof along with anti-bacterial and anti-fungal properties

Application time is drastically reduced by these lightweight sheets and maintenance is easy due to washability

LIQUID METAL

A touch of liquid metal - the ultimate hallmark of beauty for any interior wall. Unlike metal sheets, these enchanting alloys adapt to any surface, no matter the twists and turns of its design, infusing it with ethereal charm.

Beyond its stunning appearance, the liquid metal walls also offer a tangible experience akin to touching metal, without the cumbersome weight.

Crafting artistry on walls is a canvas with diverse options, ranging from stencil-based designs to direct applications, tailored to your needs.

MAGNETIC AND WRITABLE WALLS

Making any wall into a workstation or drawing board is now possible through magnetic and writable surfaces

These functionalities can be added to a number of other designer finishes as required to preserve the look of the surface

The functions can be added in tandem or separately as required

FUNCTION WITH FORM

01

Endless creative surfaces, to allow you to use any surface as a wish list, drawing board, whiteboard, to-do list, or attach your posters and picture up with magnets. All this while preventing damage to the surface look. **Magnetic walls can also be applied as a final designer coating with a stucco like finish**

02

Reduction in wastage, as it prevents the necessity to buy additional whiteboards, magnetic boards etc., which only increase the amount of material wastage in the long term.

03

Wide applicability, since these products either used in tandem or separately can be coupled with several other surface finishes allowing you to add functionality without compromising on surface finish

Milacor is a 20+ year old German company dedicated to providing unique products to craftsmen with the aim of increasing functionality through their varied product range.

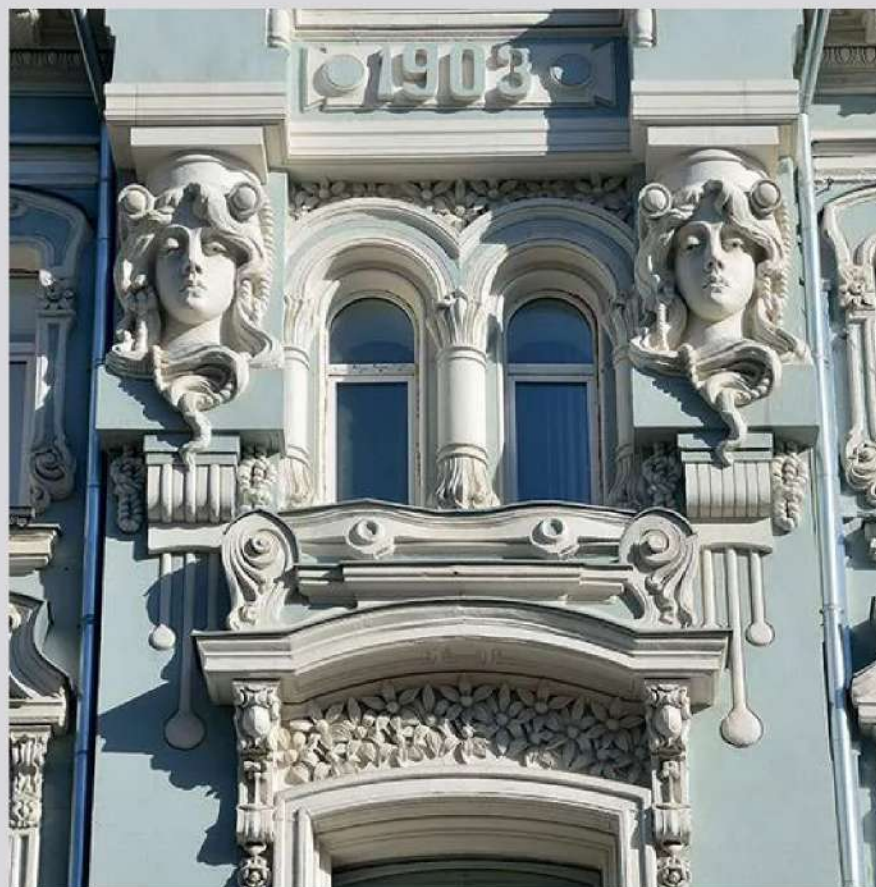

ACRYLIC-SILOXANE EXTERIOR COATING

Decorative coating for the protection of exterior walls and thermal insulation systems.

- Water-resistant, weather proof and highly flexible
- Decorative Effects are possible like concrete look or texture look.
- Resistant to mould and algae

MINERAL-BASED EXTERIOR COATING

Products made using natural raw materials which do not impede the natural transpiration of the plaster.

- Blends with the wall to create a homogenous layer
- Hide any imperfections and crack in the wall
- Available in different grain sizes

WELLNESS PAINTS INTERIOR & EXTERIOR

Lime and Mineral Silicate based paints for interior and exterior that are very low VOC and eco friendly.

- Counteracts mould and microbes without chemical additives
- Qualifies for LEED credits
- Odourless surfaces
- Solvent Free
- Low dirt pick up and resistant to abrasion
