

Wood Stove Instructions

Before Starting a Fire in the Wood Stove:

- * Gloves are available
- * Check to see if the Wood Stove is Hot
- * Gather necessary materials: lighter, paper, cardboard, & kindling.

To Start a Fire in the Wood Stove:

1. Slightly open the draft door located below the lip of the stove. Slide damper rod located on the lip of the stove to the right, HIGH.
 2. Using the foot pedal, open the lid of the stove. Keep pressure on the foot pedal to keep the lid open.
 3. Reaching down into the stove, place 3 or 4 crumpled up paper balls in one corner with cardboard on top, next place 5 to 6 pieces of lightweight kindling on top, then add one small dry log.
 4. Light a corner of the paper using the lighter or matches. Remove your foot from the pedal closing the lid.
 5. Add larger kindling or heavier logs until fire is burning well.
 6. Close and latch the draft door.
 7. Continue to add wood as needed.
 8. When the Hut is warm push the damper rod to the left, LOW.
 9. Refill wood box from the outside before leaving or if you need more.
 10. DO NOT REMOVE ASHES!
- * Always leave the draft door closed and the damper rod in LOW when you leave the building.**
