BEST SELLER HONEYCOMB

Natural honeycomb straight from the hive.

Contains pure beeswax built naturally by the bees and honey form nectar collected by wildflowers.

100% natural and untouched, fresh honey-comb, packaged without adding any heat, no filtered.

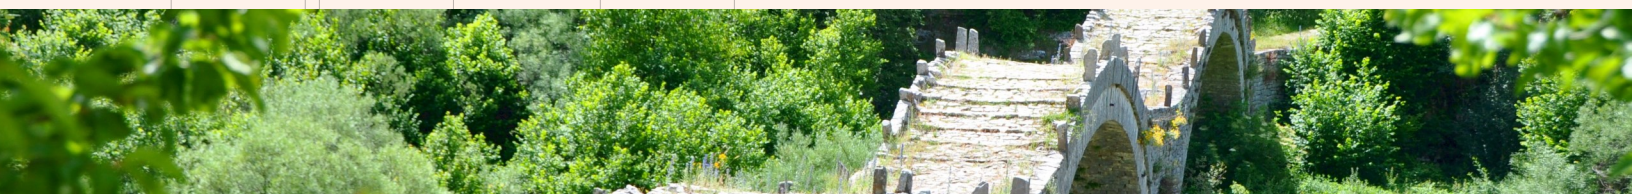

100% PURE PINE & HERBS HONEY

Natural dark colored honey, intense flavor, less sweet taste than other honeys, . This unique honey is a natural mixture that bees produce from the nectar of wild herbs and honeydew of the pine trees Moderate crystallization (3-6 months)

Aromatic herbs have always been a staple in Greek diet and everyday life especially considering the country's rich and unique flora. And as scientists are reevaluating their uses and medicinal benefits, Greek herbs are praised for their quality and organoleptic characteristics.

100% PURE WILD FLOWERS HONEY

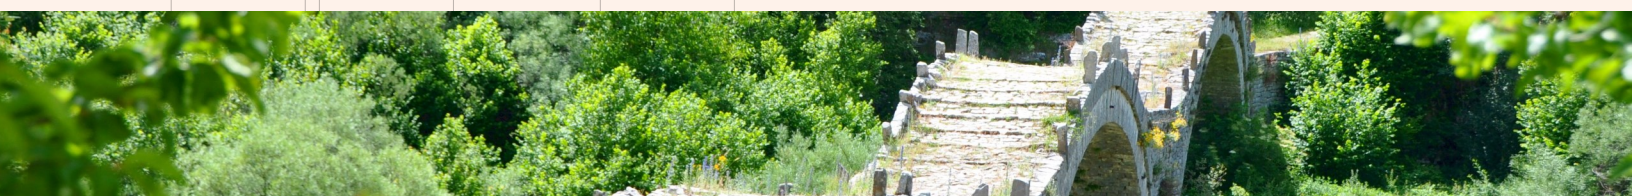

Bio-diversity

Natural honey produced by bees using the nectar of various wildflowers of the rich Greek flora. Wildflower honey is a bio-diversified honey, has a sweet and mild taste. Fast crystallization (2-3 months).

Aromatic

With some 7,500 different plants and herbs (approximately 1,200 are endemic to Greece, while about 20% are aromatic or medicinal plants), and due to the country's unique climate and rich soil conditions, Greek flora is one of the most exceptional in the world. In fact, according to international references, Greece ranks third in the world in biodiversity, and among the top five countries with the greatest wealth of aromatic plants. In light of this, Greek herbs show remarkable quality standards (percentage in essential oils, ratio of active substances, etc.) that affect their flavor and aroma as well as their action, especially when used for medicinal purposes.

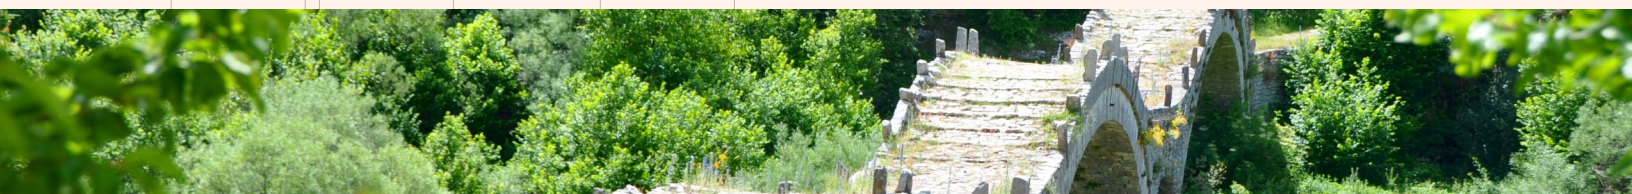

100% PURE THYME HONEY

Indulge yourself with this aromatic honey. Unique and intense flavor, amber light color. It is collected from the nectar of the thyme flowers found in Crete island. A purely Greek honey full of antioxidants. Moderate to slow crystallization (6-12 months).

Thyme is a member of the nectar producing mint family, Lamiaceae, the source of other flavorful honeys such as mint, sage, oregano, and lavender. It is collected by bees in the remote, sun drenched areas of Eastern Crete and considered as one of the best in the world. It is produced only during a very short period of the year from middle of June to middle of July
