

ANNUAL REPORT

ANNUAL REPORT 2021-22

It's been a little over two years since the pandemic brought unimaginable suffering to the whole world. But what stood out, is the unwavering commitment of our Community Health Entrepreneurs (CHEs), who were the main focal points to deliver health-related solutions in their communities. In its 21st year, Healing Fields Foundation prides itself to have had the opportunity of enabling 5650 such women to become health agents of change and inspire us every passing day in our continuing journey of creating an impact in rural, remote India.

As we embark on our quest to build healthier and resilient communities, we look back to the year that saw numerous new initiatives undertaken by Healing Fields, the impact stories of our women leaders, and the urgency with which we're moving forward. With a motive to transform communities that mostly go unnoticed and are underserved at many levels, we aspire to co-create a continuum of ground-level solutions and further our journey of generating data-driven and evidence-based outcomes

INTRODUCTION

Healing Fields Foundation facilitates training for women to provide preventive healthcare and access to entitlements for resource-poor communities in India. Healing Fields provides a holistic approach to training and supporting women, who act as health agents in their own communities.

We enable this in the marginalized states of India by giving agency to the once-voiceless women who further carve sustainable methods for creating a change, and also treat minor concerns with diagnostic care and product support. Led by an Ashoka Fellow, Healing Fields is building vibrant ecosystems of rural health care in areas where basic health services are absent or severely deficient. The approach is holistic - working to prevent health problems and facilitate access to health services and entitlements from the government, as well as treat minor concerns with care, and enable livelihoods and access to health products through entrepreneurship.

A CHE administering oximeter checks at a Covid response camp

VISION

Build an eco-system that ensures access to affordable and quality healthcare for all, especially women from resource-poor communities.

MISSION

We aim to achieve our vision by seeding and strengthening once voiceless women as Community Health Entrepreneurs (CHE) who build and scale:

- Locally-led preventive health education solutions
- Technology-driven health access
- Economic empowerment through health microenterprises
- Community-level health infrastructure development

VALUES

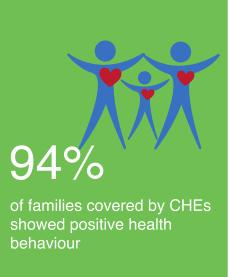

Care, Compassion, Sensitivity

ACCOMPLISHMENTS TO DATE

million people across 10

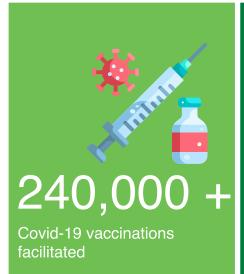

2127

ASHAs were trained with the help of local government functionaries and also collaborated with 16 partner organizations for training of 262 staff

health canters.

PROGRAM OVERVIEW

Community Health Entrepreneurship

The Community Health Entrepreneurs (CHE) is the flagship programme of Healing Fields Foundation. CHEs are women chosen from resource-poor communities of rural India who are trained in basic first-aid, illness prevention, entrepreneurship, and education on health and hygiene measures. Acting as first responders to minor health concerns, they work as health agents of change enabling an ecosystem that ensures access to quality and affordable healthcare. The CHEs further facilitate access to entitlements from the government, and also earn a steady income by promoting sanitary napkins and kitchen gardens. They are also equipped with digital literacy to monitor and evaluate local registries and use data as evidence to provide feasible health-related outcomes. To date, we have trained 5.650 women and reached over 7.06 million individuals in India.

A CHE from Gaya district in Bihar demonstrating health education

A CHE checking vitals of a community member in Gaya, Bihar

Telehealth Program Launch

Nearly 70% of people in India live in rural areas and 40% of them are below the poverty line. These marginalised communities have little access to health facilities in times of crisis. With just about 40% health workers in rural areas, there is a huge gap in resources. The Covid-19 pandemic has further heightened the importance to bridge this gap. Healing Fields launched the Telehealth program to provide healthcare facilities through a digital medium. The idea is to leverage the power of technology and our existing network of Community Health Entrepreneurs (CHEs).

They can act as first responders and facilitators to connect members of their communities to qualified health professionals through a telehealth app. This will provide access to healthcare services that are otherwise unavailable. Equipped with training and access to a telehealth app, CHEs now do an initial assessment of illnesses and connect the patients to doctors and nurses. They also encourage vaccinations, and accompany people to ensure they get the correct treatment.

We are hopeful that the Telehealth initiative will result in quality, affordable and accessible healthcare and build more resilient communities.

A CHE from Gaya district in Bihar demonstrating health education

A CHE Anita's inspiring story on promoting education

After enrolling in the Community Health Facilitator Program, Anita of Balia district in UP, ensured proper education for her children and completed her own graduation. She has motivated several other women in her village to pursue their education.

COVID 19 RESPONSE

The world witnessed a global emergency that was never seen or heard of before. The Covid-19 pandemic brought immeasurable pain, suffering and helplessness, especially in the rural areas where we are currently working.

While the first wave created a stir of anxiety and evoked fear, the second wave with new virus mutations caused unimaginable fatalities. Essential resources like medical supplies, oxygen cylinders and bed availability at hospitals were all scarce.

It was during this period that 1200 of our CHEs were identified as nodal points for Covid response in their communities. Covid emergency relief and primary health services were the cornerstones on which Healing Fields initiated a response. We administered training on prevention, isolation of symptomatic individuals, and vaccination so these women could lead education on covid behaviours. CHEs worked with local functionaries and formed resilience committees to orchestrate response. Each of these CHEs reaches 250 families, so 1.5 million individuals were reached.

Biker Network

Repeated lockdowns and the overwhelming pressure on the public health infrastructure created havoc and left people without basic supplies and medical care. During this time of dire need, a network of bikers were trained who further assisted in the distribution of medical kits including medicines, oximeters/thermal scanners to the CHEs.

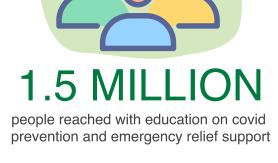

FOUNDATION S ELD Ξ HEALING

CHEs were trained and enabled to lead COVID response in their villages

767

individuals given access to nutrition, teleconsulting, sanitation, and safe isolation in 82 Community COVID Care Centers

4600 +

individuals offered teleconsulting

1200
villages provided essential supplies and medicines

34,040

individuals provided dry ration support

739 resilience committees activated for localised response

100,213

of local residents received a COVID vaccine

Education on timely vaccination

Vaccination inaccessibility and hesitancy was common phenomenon during the Covid outbreak. It resulted in millions of people - mostly in suburban and rural communities not being fully/partially vaccinated. In such a pressing time, it was critical to address this gap, with widespread awareness and localized vaccination centres. The CHEs played a pivotal role in leading village-level education on vaccination and setting up vaccination camps with support from the local administration and medical establishments.

When Suman Devi began to set up a Community Covid Care Center in her village in Uttar Pradesh, many people tried to stop her. She had to convince her community that this was the safest course of action and the best way to care for the ill and needy. Suman Devi sanitized and set up the center and took in 18 patients. She ensured that they followed safety protocols, measured their oxygen and saturation, and took meals twice a day to patients who did not receive food from home. After 14 days, many patients recovered and went home.

PROJECT ASPIRE

A CHE demonstrating the food pyramid for better nutritional habits

There goes a reimagined approach for solving societal issues at population scale. Healing Fields embarked on a journey through Project Aspire (a mission of Ashoka and Societal Platform, supported by the Rohini Nilekani Philanthropies) to build a platform that enables collaborative delivery of government entitlements.

Using data as a public good, which is readily available and accessible to the end user and has the ability to monitor and evaluate feedbacks at every stage of the user journey, is what the platform would primarily do.

Bridging the gap between service delivery of essential utilities to the last mile user, the platform will be an all-encompassing means for data-sharing and knowledge resources. It would be used by the women in rural areas, community members, local leadership like Gram Pradhans etc, thus creating an opportunity for outcome monitoring and seamless feedback evaluations.

CASE STUDIES

"The biggest enemy was my shy nature and lack of confidence. But today I know that I can achieve anything in life for myself and for my society."

We see this impact in the work of CHE Kaushalya of Ballia, Uttar Pradesh. A woman in her village was devastated by repeat miscarriages. Kaushalya stepped in in her role as a counsellor to talk to the woman and her family and discovered family dynamics that caused the expectant mother to refuse food for days at a time. Kaushalya educated the family to end this pattern. In the subsequent pregnancy, Kaushalya came to the woman's home every day for lunch to ensure she was getting the proper nutrition and used walks around the house afterwards to aid digestion and talk about prenatal care. The CHE facilitated access to local resources like the Anganwadi Center and the Primary Health Center to ensure the expectant mother was receiving supplemental nutrition and checkups. Nine months later, the woman delivered her first healthy baby.

"When a person passes away, it impacts not only the immediate family, but the entire village community,"

38-year-old Suganti Devi from Nashira village in Saran District of Bihar has been working as a Community Health Entrepreneur since 2014. Suganti Devi was moved seeing many COVID related deaths in her village.

Suganti Devi has now taken upon herself to ensure that her village is fully vaccinated. From educating people about social distancing and hygiene to persuading them to take vaccines, she has been at the forefront of the fight against COVID.

To encourage more people to get vaccinated, she mobilised people in her village using a dhindora - a type of street radio where audio messages on COVID safe behaviour and vaccination were played across the village. Seeing that more people started to turn up for vaccination, she ramped up her efforts. So from just 100 people attending the first vaccination camp, the numbers increased to 400 people in the 3rd camp.

When there was a shortage of vaccines, she went out of her way to facilitate resources from Anganwadi centres. She also took help from non-working teachers from school to manage the crowd and maintain proper inventory records at the vaccination camps.

Through our partnership with Gramvaani, Interactive Voice Response System (IVRS) is a mechanism that we have adopted so that our staff and our network of Community Health Entrepreneurs (CHEs) can address grievances in time and contain illnesses.

One such case was at Ramgarh, Bihar. When 18 children came down with diarrhea and vomiting, the villagers reached out to HFF's referral doctor through Gramvaani's IVRS platform. As soon as our team came to know about the incident, we connected with the onground CHE, who immediately sprung into action.

Reena Devi, our CHE in charge, coordinated with the block health authorities to ensure that a camp was immediately organized. Here, each and every child was assessed and treated. The parents were advised on the medication and were asked to maintain proper hydration levels for speedy recovery of their children. Reena Devi was prompt in monitoring the more severe cases and proactively shifted them to the hospital. She later found out that the main cause of this incident was food poisoning at a local wedding that was attended by the community. Due to the prompt action by Reena Devi and her team, the scare was contained. The children received treatment and many lives were saved

Reena...

RECOGNITION AND AWARDS

GROW - Edelweiss Foundation's top 100 inclusion

In the last year, we were thrilled to be selected as one of #GROW's100 – a collection of stellar grassroots organisations from across India! The GROW Fund is a first-of-its-kind initiative by EdelGive Foundation aiming towards building a resilient civil society and strengthening 100 grassroots organisations from across India over a period of 24 months.

World Economic Forum - Top 50

Last-Mile Responder In India

Healing Fields was honoured to be chosen as one of the Top 50 last-mile responders in India by the World Economic Forum, in recognition of our work during the ongoing Covid-19 pandemic.

EVENTS

Breast Cancer Screening Camp

Healing Fields Foundation organized breast cancer screening camps in Muzaffarpur and Balia: in each district, one was held at the block level in a Primary Health Center and one at the village level. At these camps, 127 women were counseled, screened, and referred as necessary.

Ashoka Livelihood Accelerator Follow-Up Events

Members of Healing Field's senior leadership team continued participating in programs led by Start Up! And supported by Ashoka that facilitated innovations in livelihood programming, strategic organizational growth, effective fundraising and communications, and collaborative partnerships.

ISDM - Agility Workshop

Members of Healing Field's senior leadership team attended a student presentation at Indian School of Development Management (ISDM), and shared their feedback on developing capacity for improving agilities and achieving scale.

UC Berkeley's Public Health Alumni Association's Professional Development Committee Fall Webinar

Gayathri Prashanth, COO, Healing Fields Foundation, spoke at the UC Berkeley's Fall webinar, as a panelist on the topic - "Global Perspectives: Leveraging the public health infrastructure and workforce in response to the COVID-19 pandemic".
