

LifeCorners is more than just a name. It's our mission!

Life is something that can be taken for granted. LifeCorners strives to increase life by providing **safer roadways**, while also providing a **habitat for wildlife**.

LifeCorners is a **Non-Profit** organization with a primary mission to **eliminate vehicle accidents** on rural roadways and other areas with blind corners or intersections. Particularly when crops are preventing visibility.

LifeCorners secondary mission is to **create bountiful wildlife habitats** within the areas designated as a Life-Corner.

For those who have lived in or near areas with dangerous corners or roadways, you know how heartbreaking it can be for a community to lose someone in an accident.

We understand the helplessness felt when a family or community is affected, and the wish to be able to do something about it.

That is where Life Corners come in.

For years we have heard people say "They need to just put a stop sign there." **or** "This corner is dangerous, I wish they'd cut that back."

LifeCorners provides farmers & landowners with a selling or leasing opportunity for up to .026 acres of corner land to eliminate the obstructed view caused by crops, timber, or unmanaged prairie.

The land is then covered with grasses, plants, or other ground covering that remain low to the ground for a clear view of other drivers or pedestrians and give wildlife and pollinators a place to thrive.

What's in it for the Land Owner/Farmer?

LifeCorners builds relationships with local landowners and provides them with an option to lease the corner land at a price that is well above their typical yield. In addition, they won't have to worry about the additional planting, spraying, and harvest work. It also allows for farmers to be much more efficient by rounding the corner to eliminate wasted time/money it takes to lift, stop, back up, & drop. Just keep driving!

So what's in it for the farmers?

Simple...

More Money. Less Work. Safer Corners.

What's in it for the Community?

The community and drivers will be first and foremost protected from blind corners on rural roadways.

This has been a problem that small towns across America have dealt with since vehicles became a regular form of travel.

LifeCorners transforms the land into various landscapes from small wildlife refuge areas to various types of monuments of those lost on a roadway or in an accident.

LifeCorners also provides package options for you to donate towards from a standard Clear-View Corner to keep the view clear from obstruction, to more functional corners with additions like low growing plants & grasses, memorials, & wildlife assistance. Choose from the available options to upgrade an existing Clear-View Corner to a more functional Life-Corner.

(Only designated corners may be upgraded with memorials or non organic additions.)
