

Summer Tips

KEEP THE CABIN COOL

Hot weather tips:

1. Don't use our ice maker as it doesn't work and we think we have it turned off. It takes about three hours to make the ice in the ice trays provided if you want to stay on top of it.
 2. These ice cube trays are best used by leaving to sit out for about five minutes and then pushing on the bottom of each ice cube to pop it out. If you try to twist the whole tray, it will break.
 3. To keep the cabin cool: Open all the windows when it begins to cool in the evening and maybe leave them open all night and keep the blinds closed on the sunny sides during the day.
 4. Feel free to use the fans.

Winter Tips

WINTER WEATHER TIPS:

1. If you have booked in the snowy months, you will want to ensure that you have a decent vehicle/tires that can handle a snowy driveway. Our driveway is level, but if there has been a fresh dump of snow just before or during your stay, it may be tricky to get through the driveway.
2. In cold/warm weather fluctuations, our gate lock has been known to freeze up. It's best to have a flashlight ready to help you unlock it and having a lighter and a warm glove/strong fabric on hand to melt it can be useful. We also find moving the numbers with a strong key is also helpful. This is rare, but can be a problem.
3. In the cold weather, make sure that you have a cord with you to plug in your vehicle. We often have one available, but to ensure you have one, it's best to bring one with you.
4. Please take care as the driveway can be quite icy, especially if there has been a period of freezing and melting and freezing again. There are times we try to park very close to the deck to avoid walking on the driveway as much as possible.
5. There is one time in January (towards the end) where the sun hits through the window just right and will set off the smoke detector (between 5-6 p.m.). We are sorry to say that you don't win a prize if this happens, but you are lucky as it is the only time of the year that it will happen.
