Improve your Security, Compliance & Governance

Get the simplified, comprehensive protection you need to innovate and grow

MINDVERSE ®
c o n s u l t i n g

Microsoft
Cloud Solution Provider

A powerful solution built for your secured enterprise

With more employees using different (personal) devices and more data moving to the cloud, there are more threats and security risks to think about. Data can easily get leaked outside your organization, devices that connect to sensitive business information can be lost or stolen, and people can make mistakes. Cybercriminals have become extremely creative in inventing mechanisms to bypass your security settings.

We help you meet your security challenges proactively. Our approach is not only to help a company deliver new solutions and workloads, but to also be a trusted partner throughout the entire cloud lifecycle. If you're looking for guidance on how to build a robust and reliable security solution for your organization, let us help you to protect your Microsoft 365 environment continuously so you can:

- **Protect identities and manage access**
- **Stop threats with integrated, automated protection**
- **Secure your apps and resources across clouds**
- **Protect and govern sentitive data**
- **Identify and remediae risks**
- **Simplify compliance management**

CYBER ESSENTIALS CERTIFIED

GDPR Certified

Enable Zero Trust with Microsoft Security Solutions !!

Instead of assuming everything behind the corporate firewall is safe, the Zero Trust model assumes breach and verifies each request as though it originates from an open network. Regardless of where the request originates or what resource it accesses, Zero Trust teaches us to "never trust, always verify." Every access request is fully authenticated, authorized, and encrypted before granting access. Microsegmentation and least privileged access principles are applied to minimize lateral movement. Rich intelligence and analytics are utilized to detect and respond to anomalies in real time.
