

STANDARD PACK

Back up anything, anywhere, anytime..

Modernize your cybersecurity & backup with integrated cyber protection !!

Safe & Secure backup & protection

Acronis Online Backup is versatile, reliable and easy-to-use. Best of all, it gives you peace of mind. Store and access important company data anywhere, anytime while maintaining safety and compliance. Acronis's solution combines more than two decades of cloud expertise with powerful backup for maximum protection and efficiency.

Ransomware Protection

Avoid downtime by actively protecting files from unauthorized modification and/or encryption. Acronis Active Protection use AI and ML technologies and white-listing to keep your data safe.

Complete Protection

Keep your infrastructure and data completely secure, whether you're facing growing amounts of data, adopting new business processes, or migrating to new applications, platforms or cloud. Acronis Cyber Backup protects 20+ platforms – physical, virtual, cloud or mobile.

Unmatched Simplicity

Save on licensing, education, integration and daily operations with a simple, scalable tool that manages any data protection task. Acronis's easy-to-learn solution protects data with less effort, so IT generalists can perform backup tasks efficiently.

Instant Restore

Manage your Recovery Time Objectives (RTO) and minimize process disruption to seconds, all while maintain your company's overall productivity with Acronis's unique runVM technology.

Blockchain Notarization

Ensure data integrity with our innovative blockchain based Acronis Notary technology which prevents damage to or tampering with your files by attacks targeting archive files.

Hybrid Cloud Architecture

Manage all forms of data protection within one workflow through a centralized management and unified control interface. Back up to any kind of storage and recover any piece of data easily with minimum downtime.

Innovatively Yours !!

Service Availability

Why Managed Cloud Backup Services?

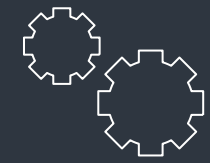

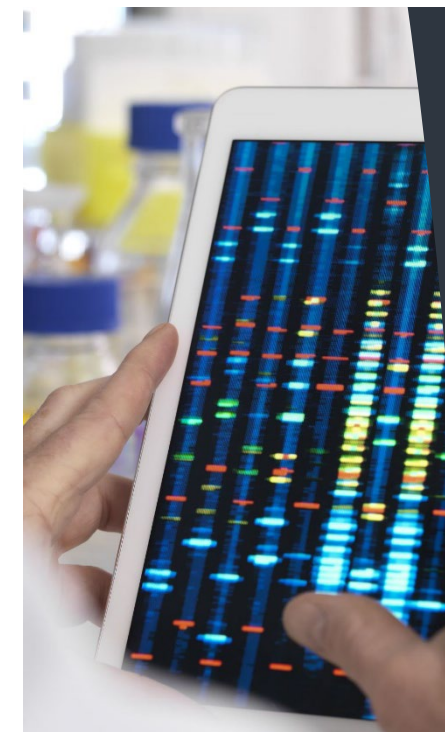

The world's best backup and recovery: Full-image and file-level backup and recovery to safeguard workloads on more than 20 platforms – with near-zero RPOs and RTOs.

Enhanced with essential cyber protection at no cost: Advanced AI-based behavioral detection engine stops malware, ransomware, and zero-day attacks on client workloads.

Integrated Service: Integrates data protection, cybersecurity, and endpoint management into a single solution with centralized management.

Low Cost solution without compromising quality: You deal with a local UK company within the legal, environment, cloud data center and common business framework like GDPR or CYBER ESSENTIAL; but get your job done from offshore (Our INDIA based office) with lower price tag.
