

Dr Dane Aaron Rowley
Consultant Clinical Neuropsychologist
Clinical Director

BSc, MSc, ClinPsyD, C.Psychol, SRCN, RAPPS

 Leeds // dane.rowley@rcns.co.uk // +44(0)7553 728 470

PERSONAL PROFILE

I am a Consultant Clinical Neuropsychologist and Health and Care Professions Council (HCPC) registered Practitioner (Clinical) Psychologist with a background in neurorehabilitation across NHS and private inpatient, residential and community settings. I have completed post-doctoral MSc training in Clinical Neuropsychology at the University of Bristol and am entered on the Specialist Register of Clinical Neuropsychologists (SRCN) which is the gold standard for the profession in the UK. I am currently the Clinical Director of Rowley Clinical Neuropsychology Services Ltd, where I lead a small team of experienced clinicians who provide treating clinician services in the context of medico-legal claims. I undertake supervision of qualified clinicians during their clinical neuropsychology training (QiCN or equivalent). I am a peer reviewer for the *Journal of Neuropsychology*.

In various roles I have worked across the gamut of acquired and degenerative neurological conditions, spanning the age and severity range. This has involved neuropsychological assessment of the effects of brain injury and neurological illness, risk management, and the development of tailored, person-centred rehabilitation plans. I have worked in the context of Mental Health Act detentions and Deprivation of Liberty Safeguards, and as such I have a working knowledge of these legislative frameworks as applied to neurological disorders. I also provide supervision and support on care provision for complex clients to multidisciplinary teams and support workers.

EMPLOYMENT
