

## Kate Fletcher

### Cognitive Behavioural Psychotherapist

BSc, MSc

 Hull // [contact@rcns.co.uk](mailto:contact@rcns.co.uk) // +44(0)7553 728 470

#### PERSONAL PROFILE

I am a dedicated and compassionate Cognitive Behavioural Psychotherapist with substantial experience working with children and young people within CAMHS services. I am skilled in delivering evidence-based interventions for a wide range of emotional and behavioural difficulties, including anxiety disorders, depression, trauma, and self-harm. I am trained in Eye Movement desensitization and Reprocessing (EMDR), Cognitive Behaviour Therapy (CBT), Dialectical Behaviour Therapy (DBT), and Compassion Focused Therapy (CFT), which enables me to adopt a flexible and integrative therapeutic approach tailored to individual needs.

I have developed particular expertise in the use of EMDR with children and adolescents who have experienced trauma, including those presenting with single incident and complex post-traumatic stress disorder. I am skilled in adapting EMDR protocols to meet developmental needs, ensuring that interventions are delivered safely, sensitively, and effectively. My work in this area has focused on supporting young people to process traumatic experiences, reduce distressing symptoms, and build resilience in order to promote long-term recovery and wellbeing.

In addition to my clinical practice, I have experience providing clinical CBT supervision to colleagues, supporting skill development and the implementation of best practice across teams. I have also designed and facilitated CBT-based group interventions for young people and developed and delivered training packages for staff within NHS trusts to strengthen service delivery and therapeutic competence.

I pride myself on my ability to establish strong therapeutic relationships, undertake comprehensive risk assessments, and work collaboratively within multidisciplinary teams to ensure safe and effective treatment. I remain committed to ongoing professional development and to delivering high-quality, person-centred care that fosters recovery, resilience, and improved mental health outcomes for children and young people.
