

The throwable microphone for audience engagement

Catchbox is the world's first soft wireless microphone that you can throw an audience to kickstart a discussion. Catchbox improves lectures, conferences, and group work by encouraging audiences and groups to share ideas and discuss problems

CATCH[®]
BOX

Engage Your Audience!

Getting your audiences involved can be difficult. Normal microphones are often slow and cumbersome to pass around. In addition, they can quickly kill the flow of discussion. That's why we created the Catchbox. The colorful box is intuitive to use, and having it thrown around engages audience members while breaking the ice. It gets people talking and sharing ideas, and can be used for different types of events - from large conferences to university lectures.

Catchbox in Education

Make lectures fun and engaging by getting everyone actively involved in the discussion.

Catchbox in Meetings

Hosting a company all-hands or a workshop? Catchbox breaks the ice and gets employees talking.

Catchbox in Events

Asking questions from the audience is easy and fun, even in crowded and packed settings.

"It makes for a better, slicker and more audible audience engagement."

FT FINANCIAL TIMES

"Play becomes central to the tone of the meeting and more people engage in the conversation."

Inc.

Some of our happy customers

Ground breaking design!

The Catchbox is a combination of innovative product design and state of the art audio technology. With a microphone element suitable for professionals and the innovative AutoMute technology, Catchbox sets new standards for the audience microphone. The combination of ultra-light materials and technical fabrics create a product that is durable and easy to use. In addition, the unique locking mechanism means the covers are easy to replace and change. Catchbox comes in five basic colors: Blue, Orange, Green, White and Grey.

Dirt Repellent & Long Life Span

The Catchbox outer cover is treated with a special anti-bacterial coating that repels dirt and avoids stains. To ensure a long lifespan of the product, all of the outer components that can wear over time can also be replaced.

Customizable outer cover

The outer cover can be customized to your specifications to match Catchbox with your brand identity, color or event theme.

Light & Soft

The combination of durable foams and technical fabric ensures that dropping and throwing the device won't damage the electronics or the person catching.

Exceptional Sound

Omni-directional mic is optimized for speech and is sensitive to sound input from speaker, even when not speaking directly into the microphone element.

Active Automute

The Catchbox senses motion of the device and temporarily switches off the audio when the Catchbox is caught, thrown, or dropped.

Magnetic locking

Catchbox is equipped with a unique magnetic locking mechanism which ensures that the inner capsule doesn't pop out when the device is thrown.
