

Caleb's Florida Fun

With the bright Florida sunshine a backdrop for each day, Caleb and his family made uplifting memories to cherish on his wish trip to *Walt Disney World*® Resort. For this four-year-old boy, the Disney theme parks provided endless entertainment and thrills. Caleb has undergone treatment for acute lymphoblastic leukemia, so to have a stretch of fun time with his family and no medical appointments was just what they all needed.

Caleb's sweet grin and frequent thumbs-up approvals were visible proof of the joy he felt inside on his wish. As a child who loves puzzles and playing basketball and other games with balls, so many games caught his eye that he just had to try as he and his family walked through the theme parks. Caleb especially loves animals, so visiting Disney's *Animal Kingdom* was a truly memorable experience—especially seeing the big cats. And for his parents, they shared that being treated as VIPs and not having to worry about trip planning and logistics felt like a huge relief and so special.

As Caleb's family looks toward the future with hope for his health to continue improving, your generosity has provided them with a meaningful respite and the opportunity to regroup as a family, together in joy.

Thank You
