

Damian's Memorable Adventure

Eight-year-old Damian is a bright boy who loves to stay active through gymnastics, soccer, swimming, and karate, where he has already earned his orange belt with a purple stripe. Living with a digestive disorder that can leave him in pain and low on energy, Damian treasures the moments when he feels his strongest, playing superheroes with his friends and dreaming about his next big adventure. For his wish, Damian knew exactly what he wanted: to visit his favorite places, *Walt Disney World*[®] Resort and Universal Studios Florida.

Damian and his family stayed at Give Kids The World Village, a storybook-themed resort for children with critical illnesses. With flexible passes for the theme parks, they explored them each day at their own pace. The big highlight for Damian was riding the superhero attractions at Universal Orlando, where he felt like the heroes he admires. He also loved the excitement of roller coasters and the magic of meeting beloved Disney characters—and of course, having the freedom to choose his own adventures each day.

Thanks to your generosity, Damian was able to step away from medical challenges and embrace a week filled with wonder, strength, and joy. His wish created lasting memories for him and his family, giving them hope and encouragement for the future.
