

Bethany's Backyard Playset

Bethany, 12, is happiest when she is outside. She enjoys playing in the leaves, blowing bubbles, and doing chalk drawings, and some of her favorite things are butterflies and music. She likes to go for walks and her favorite food is watermelon. Bethany has a life-threatening genetic disorder and often has to use a wheelchair, which can make playing in her backyard challenging. For her wish, she chose to have a playset!

Bethany's wish has made it possible for her to experience more carefree play with her siblings. Through your generosity, new to her backyard is a playset with lots of fun features; best of all are the accessible swing and the slides. Bethany loves gliding through the air when she uses them.

Your support has truly changed Bethany's life. We thank you for helping Bethany to feel more independent as she enjoys safe backyard fun with her siblings.

Thank You
