Gannuver Trading Limited has been supporting leading aerospace and defence companies with new business and commercial development opportunities by providing onsite representation and technical consulting services worldwide. **Gannuver's** core team consists of experienced and highly specialized industry professionals with a reputation for proven success in both marketing, sales and customer support activities.

For more than a decade now, **Gannuver** has been representing world-class corporations who specialize in Maintenance Repair and Overhaul (MRO), aircraft and engine spare parts supply, fixed and rotary aerial firefighting solutions, customized pilot simulator training, naval system spare parts, and innovative defence and civil protection solutions.

AIRFRAME SUPPORT:

Airframe scheduled maintenance, repair, and upgrade programs has been one of Gannuver's leading businesses on platforms such as the Lockheed Martin's C-130 Hercules, Lockheed's P3 Orion, Bombardier's CL-215 and CL-415 series fire-fighting aircraft and more. Now, Gannuver also offers airframe maintenance solutions in the civil aerospace sector adding more depth and scope to its representation platform.

POWERPLANT SUPPORT:

With its roots nestled in the renowned Pratt & Whitney PT-6 engine, Gannuver has been representing engine MROs since its inception. From field repairs, to shop visits, to borescope inspections, Gannuver Trading has been engaging with its strategic engine MROs on a full range of engine maintenance services across several engine models including propeller systems - and the list continues to grow...

AERIAL FIREFIGHTING SOLUTIONS:

With climate change driving longer and more intense fire seasons across the globe, aerial firefighting has become ever more necessary for forest, wildlife, and civil protection. Gannuver Trading has been a long-standing supporter and representative of several turn-key fire-fighting solutions, from direct sale of aircraft assets, to spare support and training. Now Gannuver has both acquisition and leasing solutions for both fixed wing and rotary assets.

NAVAL APPLICATIONS:

With an even faster growing platform than ever before, Gannuver Trading now has the strategic partners onboard to support naval and maritime protection systems in a wide range of defence and civil protection roles. Gannuver's current naval spares manufacturers and distributors, have an extensive capability listing for maritime spare parts support, both above and below the water.

SIMULATION & TRAINING:

Just as important as the aircraft, ships, and ground vehicles we support are the pilots, crews, and operators of these essential assets. With advanced training solutions now available, more complex, focused, and expanded training regiments can now be offered across multiple platforms and a wide variety of training tools.

CIVIL PROTECTION & DEFENCE:

Apart from aircraft, powerplant, maritime, and ground systems, Gannuver Trading now also represents manufacturers and distributors of a variety of tools and equipment used in multiple defence, security, and civil protection branches of government. From personal load-carrying equipment, to new system technologies, the capabilities and available industry solutions continue to grow...

A military helicopter, likely a Black Hawk, is shown in flight against a cloudy sky. The helicopter is viewed from a low angle, showing its rotor blades and tail rotor. The lighting is dramatic, with the sun low in the sky, creating a silhouette effect on the helicopter's body and highlighting the texture of the clouds. The overall tone is professional and emphasizes the operational nature of the aircraft.

AFTERMARKET SUPPORT:

With increasingly demanding mission profiles and growing use of advanced integrated platform and systems, dispatch readiness and continuing support has become just as critical as the product itself. Logistics, shipping, and technical challenges coupled with on-demand support requirements, necessitates local knowledge and expertise to improve support efficiency, cost, and mitigate critical delays. Gannuver has been a long-standing and capable aftermarket support team for all of its OEM partners.
