Single side: The weight of the upper layer shall not exceed the sum of the two layers below.

Keep the weight of the goods on both sides roughly equal

If the weight difference between the two sides is too large, it is easy to be dangerous.

Lay horizontally

Don't climb and shake

Unload the stacks when moving

Far away from the fire or heating equipment

Don't put the shelf in the place with high temperature, moisture or in the direct sunlight

Don't clean it with chemical material

Don't put the wet or hot things on the shelf

Must use within limited

Load evenly

Reduce loading according to the transfiguration of shelf or board

The heavier cargo should be put on the lowest layer for the stability

Don't let child climb and play

Don't push the shelf violently
