

Examples of light stage make-up for younger dancers (3-6yrs) in recital

Both pictures shown for “lightness”, but if under stage lights, it will need to be slightly darker for the dancer’s face to show up. Browns should be used on eyes instead of the blues and purples shown here.

A good example of the browns. Lip color is a good stage color as well.

Another example for a little older student (7-10 yrs)
