BIGDOG DIESEL REPAIRS HEIGHT AND SLEW LIMITER:

- This electric lockout system has been designed to allow safe operation of excavators, loaders and skid steer loaders when working under overhead powerlines, in and around bridges, tunnels, live traffic and onsite exclusion zones
- Unique 3 key system ensures no height and slew related downtime during periods of no use
- Key specific removable and lockable restrictor activation ensures system remains active in danger zones
- Audible and visual lockout alert in addition to machine function lockout to ensure prompt identification of lockout zone

Technical Specifications:

- 12v and 24 Volt compatible
- Pre-set Adjustable Height lockout for full machine operating range
- Fully adjustable 0- 360-degree slew lockout on excavator systems
- Unique pre-set calibrations ensure system adjustments are made by authorised personnel only
- Suitable for all Makes and Models 1.7 – 50 tonne
