ART ART ART ART ART  
IS EVERYWHERE

Art lives in the spaces between words, in the colors of sunset, in the stories we tell, and in the way we move through the world. It is not simply confined to a canvas or a stage. It exists in us, in our curiosity, and in our imagination, and in our courage to create something uniquely our own.

Art drifts through our lives like light through a window, changing shape depending on who is standing beneath it. It is found in bold colors and quiet moments, in wild imagination and careful intention. No two artists see the world the same way, and no two dancers move through it alike. That individuality is what makes creation so powerful. Tonight, we celebrate the beauty of expression, the courage to be seen, and the endless ways we are extraordinary. Art is not simply something we make. It is something we live. It's everywhere.
