

ECO-FRIENDLY DRIVING TIPS

HELP REDUCE YOUR FOOTPRINT WITH THESE IDEAS

PLAN

Check your route before leaving home to avoid traffic congestion and construction zones

MAINTENANCE

Make sure to perform regular vehicle maintenance such as checking the tire pressure, air filter and oil levels to ensure optimal fuel efficiency

WALKING

Next time you need to go a short distance from your home or work consider parking your car and walk instead

AVOID IDLING

Leaving your vehicle running consumes fuel and causes unnecessary wear and tear! Skip the drive-thru and go inside. When stopped to make a call, send a text or waiting for a passenger shut the engine off
