

Let's Cleanup the Earth's Oceans!

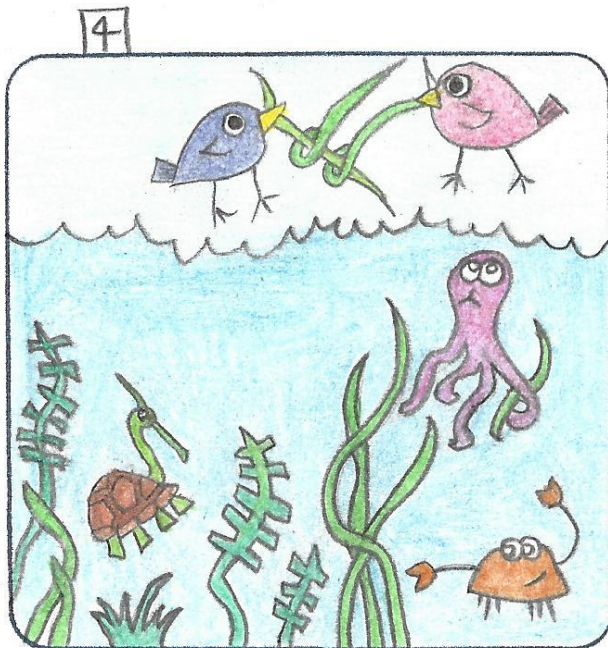

Kids, look at all this plastic waste in the water, it is not healthy for the plants, animals or the people.

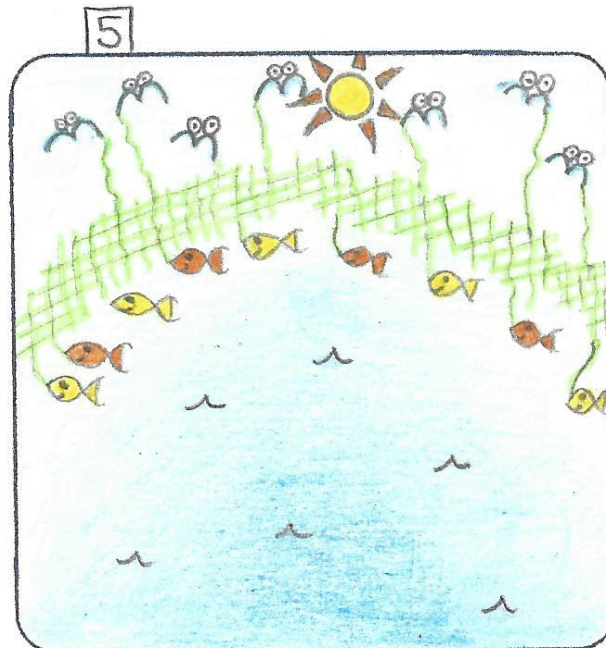

It is time we worked together and took some action!

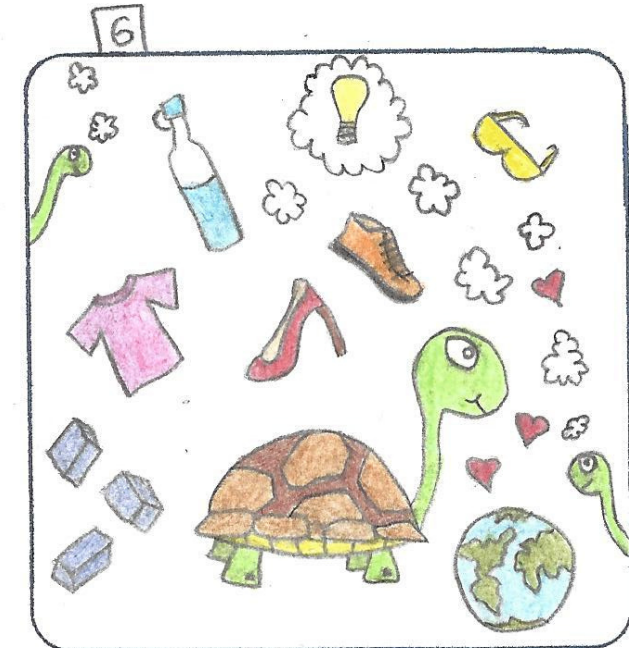

We need to work with each other to build something to clean up the water.

We can use plants from the sea and Earth to make a giant net to capture the plastic.

The net is now complete, it stretches as far as the eye can see! As a team, we will retrieve all of these plastics from the water.

We have cleaned up the ocean now, let's re-purpose these plastics so they can be used again and then donate our earnings towards keeping the planet healthy!
