

Did You Know? Tiny Homes:

- Are typically much less than 500 square feet in size - as small as 80 ft²!
- They can be stationary or on wheels
- Tiny home villages exist to support homeless, low-income or at-risk people and small families.
- Are affordable and allow for a low cost of living
- Allow people to work less and have lower levels of daily stress
- Are made with eco-friendly, recycled and sustainable materials
- Are often custom-built to the owner's needs
- Help reduce energy and water consumption
- Lower your carbon and eco footprints
- Promote minimalism and encourage a simpler, greener lifestyle
- Have low maintenance costs
- Reduce your commuting time and greenhouse gas emissions
- Produce less waste
- Are well-insulated for year-round living
- Can be rented for a vacation if you want to try out tiny living for yourself!
