

Check for Leaks

Inspect all faucets, shower heads and toilets in your house to ensure they are in working order and there isn't any slow leaks

Install Water Saving Gadgets

Purchase water restricting aerators for your faucets and water-efficient shower heads from your local home renovation store. You can also buy kits to convert your existing toilet to a dual flush

Reuse Water Where Possible

Save the water from cooking pasta and vegetables, let it cool down and use it to water your plants

Household Water Saving Tips

Check the Weather Forecast

Pay attention to when rain is coming to your area and only water your outdoor plants if needed

Use Appliances Efficiently

Always run your dishwasher and washing machine when full; avoid doing small or half loads
