ABOUT US

In 1994, the founder began fabricating natural stone, marking the start of a family legacy. since then, the family has expanded to own stone quarries and invest in multiple stone processing factories. the younger generation focuses on exports, dealing in granite, marble, sandstone, slate, quartz, and more.

Our entrepreneurial vision and continuous investment in modern equipment, technology, marketing, and research and development have shaped us into an industry role model. with the most competitive prices, the most professional processing factories, and expert quality inspection teams, we ensure that every batch of exported stone products meets high-quality standards.

for twenty-five years, we have tirelessly pursued perfection every day.
