# A Single-Source Solution Provider for All Your Security Needs

Comprehensive security solutions are more than having a firewall in place and a locked front door. The heartbeat of your business is your customer data and financial exposure, and every day we see front page headlines for data breaches, even at Fortune 500 enterprises. Small businesses are attacked daily as well, and often the damages are so devastating that they never recover, both in terms of financial losses and reputation.

At Straticom, we recognize that security is also more than technology... it's about the technical solutions, processes to evaluate and react to potential threats, vulnerabilities, and impacts, plus user training and education.

Cybercrime damages are estimated to globally cost $6 trillon annually by 2021, and ransomeware damage costs are predicted to be 57x higher in 2021, reaching $20 billion, compared to 2015.

Straticom partners with industry leaders to implement secure protection for everything from your data and brand to your property and network.

## KEY SECURITY SERVICES

✓ Penetration Testing & Environment Audits
✓ Full Security Operations Center (SOC) as a Service
✓ Physical security protection (IP cameras / door entry / video)
✓ Web and Application Firewall Management
✓ Distributed Denial of Service (DDos) Mitigation

✓ Virtual Chief of Information Security Officer (CISO)
✓ Disaster Recovery and Backups
✓ Data Loss Prevention (DLP)
✓ East/West Traffic Monitoring & Breach Protection
✓ Behavioral Management / Staff Training & Awareness
✓ Professional Services Security Consulting
✓ Security Incident Event Manager (SIEM) Platforms, Reporting & Monitoring
✓ Intrusion Detection/Prevention Systems (IDS/IPS) Management

## LAYERS OF SECURITY

Cyber security and physical security are not just about technology. While technology plays a substantial role, alone it is not enough to protect you from modern vector attacks.

Straticom follows the ISO 27001 standard that recommends every comprehensive security solution address all areas of information security risk including people, process & technology.

By following this standard, we are confident we can help protect your mission-critical assets, and bring the solutions required to protect, monitor, and respond to attacks from all vectors—protecting more than just your data and your network, but also your brand and reputation.

**OUTSIDE THREAT PROTECTION**

| PERIMETER SECURITY | NETWORK SECURITY | ENDPOINT SECURITY | APPLICATION SECURITY | DATA SECURITY |
|---|---|---|---|---|
| Perimeter Firewall | Enclave/DataCenter Firewall | Desktop Firewall | Static App Testing/ Code Review | PKI |
| Perimeter IDS/IPS | Enterprise IDS/IPS | Host IDS/IPS | Dynamic App Testing | DAR/DIM/DIU Protection |
| Secure DMZs | VoIP Protection | Content Security (anti-virus/malware) | WAF | Data Wiping Cleansing |
| Message Security (anti-virus/malware) | Inline Patching | Endpoint Security Enforcement | Database Monitoring/ Scanning | Identity & Access Management |
| Honeypot | Web Proxy Content Filtering | FDCC Compliance | Database Secure Gateway (Shield) | Enterprise Right Management |
| DLP | NAC | Patch Management | | Data Classification |
| DHS Einstein | Enterprise Message Security/ Wireless Security/ Remote Access | DLP | | Data Integrity Monitoring |
| | DLP | | | Data/Drive Encryption |
| | | | | DLP |

### PREVENTION

IT Security Governance
Security Policies & Compliance
Security Architecture & Design
Continuous C&A
Cyber Threat Intelligence
Threat Modeling
Risk Management
Security Awareness & Training
Penetration Testing
Vulnerability Assessment

**MISSION CRITICAL ASSETS**

### MONITORING & RESPONSE

Continuous Monitoring and Assessment
Situational Awareness
Focused Ops
Escalation Management
Digital Forensics
SIEM
SOC/NOC Monitoring (24x7)
Incident Reporting, Detection, Response (CIRT)
Security Dashboard
Security SLA/SLO Reporting

### PEOPLE + PROCESS + TECHNOLOGY

| PEOPLE | PROCESS | TECHNOLOGY |
|---|---|---|
| Staff Training & Awareness | Management Systems | You can't deploy technology without competent people, support processes or an overall plan. |
| Professional Skills & Qualifications | Governance Frameworks | |
| Competent Resources | Best Practices | |
| | IT Audit | |

## ABOUT US

Straticom designs and delivers IT & communications solutions and services that help organizations execute on their strategic goals.

Our focus? Every business is unique, so we start with listening to the needs of our clients, and then exceed those needs in every way.

Contact us today to learn more about what Security services are right for your business.

## WHY WORK WITH US?

✓ Objective & vendor agnostic to evaluate multiple security options

✓ Will learn your business structure and goals

✓ Will understand your IT infrastructure and vulnerabilities

✓ Will determine the optimal comprehensive security solution

✓ Will manage the implemention and support of the selected solution

✓ After implementation support including customer service and escalations

✓ Be integrated as part of your organization's ecosystem
