## Semi-Private Cake Decorating Class - Geode

---

\$200 – 3 HOURS

In this class we will be up close and personal as there is a maximum of 4 students. This affords the instructor the ability to provide one on one instruction and attention to the students. Students will frost and carve a cake to create a geode cavity. We will marble the cake, cover the cake in fondant and add all of the necessary details and shading to make it look like a real geode including placing the “rocks”. Students will leave with a ready to eat masterpiece.

Some of the points we will teach you:

- How to roll fondant into the desired thickness without tearing or elephant skin
- How to carve and smooth your cake into the desired shape after frosting
- Learn how different filling options can be used in your carved cakes without affecting structure
- Basic cutting and molding skills
- How to stick rock pieces together and or use other edible materials to add realistic details
- How to add details, shading and veining to make the marble “pop” and the stones look real

We look forward to teaching you these great skills, that can be used at every event you have from here on out and can be modified to make other designs and can even be used on cake!
