

PVF Security Consulting

School campuses in the U.S. are generally safe. However, within minutes, any campus can find itself in an emergency situation such as an active shooter on campus. With current economic conditions resulting in budget reductions, many schools have postponed – or overlooked – necessary security precautions to properly secure their students, staff, and campus.

Before spending money on security upgrades, let the experienced, professional experts from PVF Security Consulting conduct a complete risk assessment of your campus.

Each school campus faces its own different challenges. A risk assessment serves as the framework to identify the right strategies for each school and their budget.

Turn to PVF Security Consulting's professional experts for:

- Complete Campus Risk Assessment
- Emergency Preparedness (Before, During and After)
- Campus Lockdowns and Procedures
- The Active Shooter
- The All-Hazards Approach
- Grants and Other Funding Sources
- Security Solutions (CCTV, Access Control, Mass Notification, and others)

PVF Security Founder, Patrick V. Fiel, has more than 40 years of experience in managing security and law enforcement organizations and is a nationally recognized expert in campus security for both K-12 and higher-education clients. Highlights of his experience include:

- Executive Director of School Security, Washington, D.C. Public Schools
- Senior Law Enforcement Advisor, West Point Military Academy
- National Public Safety Advisor, ADT Security Services
