

The Active Shooter; the Lone Wolf

REGISTER Below to view the ONDemand Version

This webinar occurred on: September 7, 2016

Over the past year, these individuals have haunted the United States in senseless attacks from Charleston to San Bernardino to Orlando. Recently they've included Dallas and Baton Rouge. They're not going away anytime soon.

Private and public organizations will have to take specific actions to better protect employees, customers and their own property. There are several questions you should be asking, such as, what have I done to mitigate risk? When was the last time I spoke with a security expert? And when was the last time I reviewed an emergency crisis plan? This webinar will answer these questions and others, such as, when was the last time I had active shooter training?

Tomorrow might be too late.
