MARCH 2024

We hope you voted on Super Tuesday and attended your local caucus. February was a busy month with members of COIFFE's Executive Committee volunteering as Election Judges and Poll Watchers for the Presidential Primary, as well as training, preparing for and hosting caucus.

COIFFE HIGHLIGHTS/NEWS

✦ Task Force: Significant progress was made this past month in completing the Colorado Scorecard for the United Sovereign Americans (USA) initiative. Final scripts were written and executed, and the final draft scorecard was reviewed by the USA Leadership team. Additionally, the 2022 General Election Validity Reconciliation and Colorado Resolution of Valid Elections documents are being drafted. These documents will be used to inform citizens and election officials of the Colorado voter roll issues.

✦ EagleAI for Colorado is now up and running. Their implementation has (and continues to have) growing pains with significant and impressive improvements. We will be in touch with COIFFE volunteers who have patiently waited for these EagleAI enhancements to come to fruition.

✦ On a national level, there are positive changes at the Republican National Committee. Michael Whatley and Lara Trump were elected as the new Chair and Co-Chair on Friday, March 8th. Read more here.

✦ COIFFE's next volunteer meeting will be Monday, March 18th at 6pm via Zoom. Bob Cooper will present his analysis of undeliverable ballots and we will be sharing a new volunteer project regarding colleges and "undocumented citizens".

✦ COIFFE is seeking volunteers for our "County Task Force". If you are interested in leading or co-leading a task force for your county, please contact Marc Gitlitz for further details.

✦ If you are interested in writing an article on local Task Force activities and results for our COIFFE website, please submit your draft to our "Contact" email address above.

✦ COIFFE completed an analysis of undeliverable ballots returned to counties during the 2022 general election and found evidence of over 12,000 missing ballots in 3 counties. In addition, CORA reports indicated a complete lack of focus on chain-of-custody regarding movement of these undeliverable ballots between the USPS centers and the county. Why is this so important? Undeliverable ballots are critical for updating voter records to determine if the voter status should be changed to "inactive" ("inactive voters do not receive a ballot the following election). Our analysis was done by requesting CORA information from 11 counties. Each county was asked for USPS BRM (Business Reply Mail) invoice records for undeliverable ballots and the Mail Ballot Reconciliation Report. Of the 11 counties analyzed, only 2 counties had near matching numbers. This is very concerning. The information from the analysis has been sent to multiple counties as well as the US Postal Inspector. In addition, CO Representative Ken DeGraaf (Colorado Springs) presented the report to the CO legislature approximately 3 weeks ago. If you would like to learn more,We will be discussing this topic at our Monday, March 18th Zoom call. The analysis report is below for your reference:

NOTES: -Very small variance.
-Pueblo has no USPS transaction in Nov. No county had that.
-All information is based on information from CORA requisitions in each county.
-The Mail Ballot Reconciliation Report and USPS invoiced billed to the election department from the CORA.
-The process for voiding undeliverable ballots is being researched.
