IHERQLES -- THE SCIENTIFIC BREAKTHROUGH OF THE CENTURY!

More than 50 years in research and development by a huge research team, half of whom are quantum physicists

... this project was originally funded by British Royalty for the purpose of finding the cause of aging and the solution for all age-related issues!

This Elite Science Team was headed by Ana Aslan for the first 40 years. She was credited with discovering the cause of aging and their first revolutionary product, Gerovital. But

their ultimate goal was to create a 100% plant-based product that could reverse aging ... and that could do no harm. And it is here now -- iHeRQles!

Consisting of 44 of the most powerful plants on the planet, this goes way beyond a mere extract. In fact, this Science Team discovered how to go into the Quantum Structure of plants to locate, isolate, and remove the highest frequency, most active, and restorative parts of these plants. So where there may be thousands of different types of molecules with different qualities in the leaves, stalk, roots, or fruit of a plant--they may choose as few as 2 or 3 molecules from each plant! This is highly engineered, computer-driven technology with 1:150 million variables!

More than 300,000 patients have successfully used this product in Europe through Medical Doctors with no negative side effects, allergic reactions, or contra-indications making this the safest and most powerful plant-based product on the planet ... that can actually reverse biological aging and issues by up to 20+ years!

This is scientifically documented!

A test of fifteen hundred people who used this product and reversed their age by up to 20+ years was verified by the 3rd party testing lab that received the Nobel Prize in Anti-Aging for developing the first accurate test for biological age. This lab had never seen anyone actually reverse biological age by more than 3-5 years until they received these blood tests which recorded between 10 years and up to as much as 30 years in reversed biological age!
There is nothing else that does this.

How does this work? It doesn't do anything--it is a food ... but oh what the body can do with it!

Four sprays of this premium food in liquid form under the tongue wakes the body up. The body eagerly welcomes it right into the bloodstream!

Life is in the blood and the blood receives it by opening the circulation and micro-circulation to take full advantage of these quantum nutrients, the likes of which it has never seen before. And things begin to happen.

What things? Circulation and micro-circulation opens and improves, inflammation is released, the harmful low-frequency things in the blood raise up in frequency so they can be safely eliminated, the immune system gets nourished so it can isolate and discard fast aging and damaged cells in massive numbers and they can be replaced by newly nourished and energized self stem cells with long telomeres instead of being replaced by duplicates of our old cells with short telomeres.

This quantum nutrition allows our bodies to be nourished to the point of cleaning out the old and ushering in the new!

This is Reverse Biological Aging at its finest!

So -- How would YOU like to reverse your age by up to 20+ years? Can you imagine how you would look and feel

if you did reverse your biological age by 10-15-20+ years and all the conditions that go with it?

Ridiculously Expensive—right? NO -- Only \$79 a bottle and much less in a 4 pack or a 9 pack.

Compare that to stem cell injections costing many thousands of dollars or the super expensive anti-aging products. And neither of those have tested to reverse aging even close to as much as iHerQles!

And it is so simple to use! Just 4 sprays under your tongue ideally 15 minutes before you eat for the most added advantages, but anytime you spray it - it works. Once a day is good, twice a day is better, and three times a day is best ... because it keeps it in your bloodstream all day long for the fastest and best results. **And if you do it three times a day consistently for 4 months it is a complete upgrade in your blood.** Let me explain why. Four months is a complete blood cycle. In that time every red blood cell dies and a new one takes its place. So if it is in your bloodstream all day long, new blood cells will be formed in the presence of these high-frequency molecules and take on the frequency, the information from nature, and the quantum nutrients.

So 3 times a day for 4 months is 12 bottles. Then you can drop down to 1 bottle a month or 4 sprays once a day for maintenance unless you have very serious issues and want faster results.

And now this age-reversing product is available to me and YOU and everyone who is looking for true health and natural age reversal!

Dog bite injury! Using iHerQles and iRevive! (YR on Spray)

Many years of unresolved skin condition - Cleared up and glowing after 7 months using iHerQles and iRevive.

Fibromyalgia, inflammation and pain reduced after 4 sprays - 3 times a day for over 4 months!

Achieve the iHerQles GLOW!

LIVE LONGER NOW

Humanity's pandemic of 1919-20, the Spanish flu, wiped out 15 million people. This was such a shock and disrupter to the royalty throughout Europe, but they sought out the greatest scientific minds who they directed to search for a natural way to prevent influenza demies. These scientists gathered 10,000 substances from mostly plants and isolated the 400 superior compounds. This gathering of botanical medicinals were assembled to strengthen the human body and support the immune system in fighting disease

Dr. Ana Aslan decades later, gathered a team of brilliant minds to analyze the compounds in this elite mixture.

Dr. Aslan now was searching for the key to unlock youthfulness and she found it. The 1950's refined the formulization and it came one step closer to what we now utilize in the twenty-first century. Average people were not aware of these happenings so it fell into the mindset of the upper crust making it costly.

Nobel Prize winners were on the hot pursuit of longevity in the 1970's. They revisited the work done two-decades earlier

and became enamored with the potential of this elixir being pro-active-aging. They began studying tens of thousands of people meticulously and discovered what they called "Quantum Molecules."

They also established that a gathering of these powerful plant molecule symbiotically afforded a significant increase in cell repairing factors. They now determined that 44 plants from all over the globe refined without heat, harvested the high frequency molecules that were the essence of the plant medicine

Interesting enough the stem, the leaf, the stalk, the roots, the fruit, all had different supportive molecules. At times they harvested two or three molecules from each part of the botanical.

Romania became the hub of this herbal powerhouse research and as time passed, leading scientists established that if we could deliver this in an unadulterated mist under your tongue, the effect would be more dynamic and dramatic. Now, this twenty-first century quantum technology breakthrough has raised the bar in nutra-pharmaceutical benefits.

Nobel Prize CLIA government testing lab worked with 1,500 people over the course of 20 years. (There were original studies with other natural means that only resulted in a 3-5 year reduction in biological aging.)

With the use of iHeRQles, the minimum age recovery was 5 years with a maximum of 30 years. Science should not be surprised that nature harbors the foremost food/medicines to support a healthy and long life.

Here at Hippocrates Health institute one of the resounding positive effects we see is in the blood profiles. Of course there are people who are taking iHeRQles and those who are not. We then compare the differences from the control group to the users. Blood sugar stabilization, increase protein levels, and an overall sense of wellbeing is being observed in data and reported by the people employing this living spray.
